OHIO HI-POINT
Career Center

WELCOME TO OHIO HI-POINT

Located at the Highest Point in Ohio

Founded in 1974, Ohio Hi-Point Career Center is a career-technical school district serving 14 partner schools in five counties.

About Us

Welcome to Ohio Hi-Point Career Center (OHP)! Our mission is to develop our most valuable resource – people – by providing quality career-technical and academic education.

OHP is a school of choice for students to gain a hands-on education in a specific career path. The Bellefontaine Main Campus serves juniors and seniors in high school while the district's satellite programs, which bring career programming directly to students in their partner schools, serve seventh through 12th grade students in 11 out of the district's 14 partner schools.

Students can receive professional certifications and specialized credentials needed for 21st century careers as well as earn college credit for OHP coursework, making higher education more affordable for today's families.

In addition to providing educational opportunities for high school students, Ohio Hi-Point also provides short-term and online classes for adult learners as well as partners with Clark State Community College (CSCC) to provide a full-service Clark State location on the Bellefontaine Main Campus.

For businesses, the career center's Business Resource Center provides cost-effective and convenient customized business trainings for companies in and around our area.

Continuing Education for Adult Students

In a constantly evolving world there's always something new to learn. OHP provides short-term and online classes for adult learners as well as the following educational opportunities.

Business Resource Center

To support the businesses within Ohio Hi-Point's five-county district (and far beyond), Ohio Hi-Point established the Business Resource Center to provide cost-effective and convenient customized business trainings for companies. The benefits of employee training and development include a company-wide work efficiency, opportunities for innovation and fresh ideas, and reduced employee turnover.

Clark State Classes, Ohio Hi-Point Campus

In 2012, Ohio Hi-Point's Adult Education division partnered with Clark State Community College to have a full-service location at the Ohio Hi-Point Bellefontaine Main Campus. Logan County students can apply, take placement tests, meet with an advisor, request financial aid, and register for classes without traveling to Springfield. Many courses are also available online, providing students easy access to higher education.

DID YOU KNOW?

Before Ohio Hi-Point existed, the campus was home to the 664th Aircraft Control and Warning Squadron of the United States Air Force.

Established in 1951 during the Cold War, the radar facility monitored the skies at the highest point in Ohio as part of the nation's Air Defense Forces.

After the base was phased out in 1969, Logan County educators established Ohio Hi-Point JVS and opened its doors to students in 1974. Many of the original buildings remain and have been renovated to fit the needs of the career center.

Rich in history, you will find artifacts, photos, and articles displayed in the school paying homage to the servicemen and women of the 664th A.C.&W. Squadron.

Career-Technical Education for High School Students

Serving Ohio Hi-Point's District

Our talented staff connect people's skills to their passions, helping shape a productive workforce for a prosperous community. The blend of practical application and strong academics creates the dynamic education that challenges and engages our students.

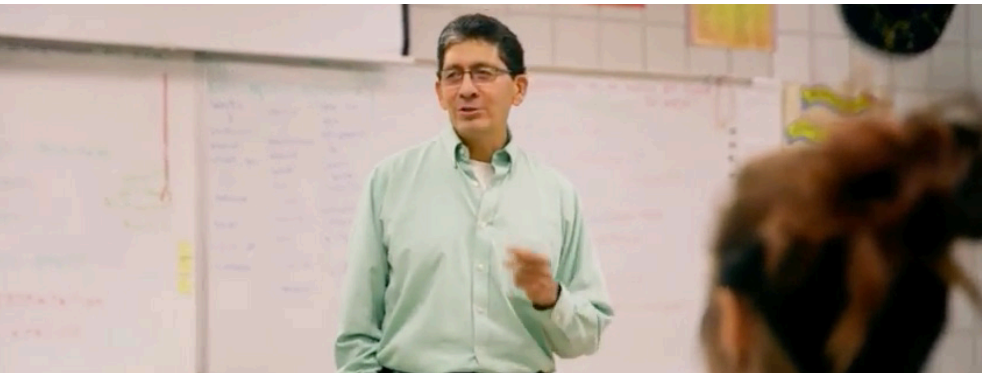

Ohio Hi-Point serves students from Auglaize, Champaign, Hardin, Logan, and Union Counties in the following school districts: Bellefontaine, Benjamin Logan, Graham, Indian Lake, Kenton, Marysville, Mechanicsburg, Ridgemont, Riverside, Triad, Upper Scioto Valley, Urbana, Waynesfield-Goshen, and West Liberty-Salem.

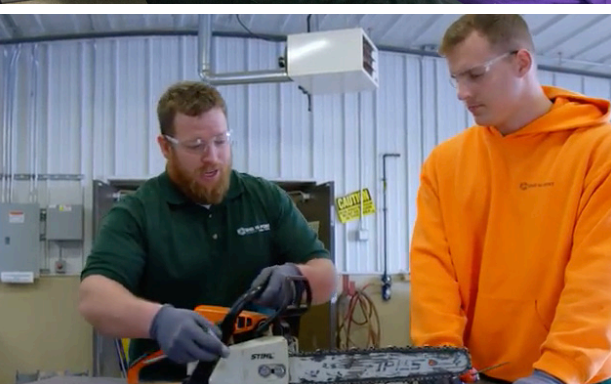

Ohio Hi-Point recognizes how important it is to ensure
EVERY STUDENT HAS A PLAN
for employment or continuing education.

TODAY'S CTE PROVIDES STUDENTS:

- **Value-added education** by giving students between 450 and 900 hours of career training
- **Career pathways** that connect to workforce and postsecondary education
- **Employability skills**, from job-related skills to workplace ethics
- **Education for additional training** and degrees, especially related to workplace training and career advancement

Redefining what it means to pursue CAREER TECHNICAL EDUCATION

Experiential Learning. Students apply knowledge gained in the classroom to real-world application. From building houses to cooking meals for customers, our students run businesses, design, repair, build, market and are fully engaged in real-world learning.

College Credit and Industry Certifications. Ohio Hi-Point has several partnerships already secured with colleges and universities for students to earn college credits through options such as College Credit Plus, articulated credit, and CTAG credit. Students earned 204 College Credit Plus credits during the 2018-19 school year.

Top-Tier Instruction. Our teachers challenge our students and celebrate the “eureka!” moments. They push our students to unlock their potential and provide guidance when the day gets tough. They believe in a hands-on education and cultivate the critical thinking skills to breakdown problems and create solutions.

21ST CENTURY EDUCATION

FOR 21ST CENTURY JOBS

Our students are finding success in and out of the classroom. From our Experiential Learning Program to our business and industry partnerships, students have the ability to dive deeper into career and college exploration and be set up for success from a strong network of professionals.

Business and Industry Partnerships

Ohio Hi-Point's business and industry partners are actively involved in the career programs. They guide curriculum development, provide classroom demonstrations, judge local skill events, provide internship sites for students, and serve as mentors. The support from Ohio Hi-Point's business partners help provide a pathway for success for students.

College and Career Exploration

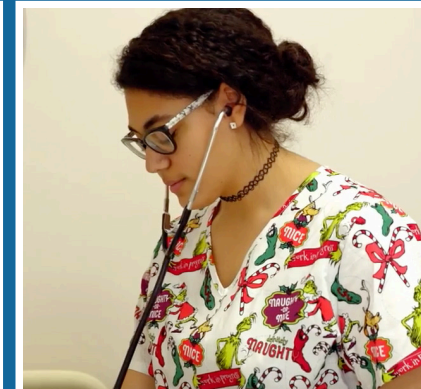

Several colleges and universities have articulation agreements with our programs, and many classes take study trips to those colleges and universities to give students a look at multiple campuses and programs. Our school counselors also provide students ACT and SAT resources and keep students up-to-date on the latest application deadlines and scholarship opportunities.

Career/College Placement Rate
Based on survey responses from the 2018 graduating class.

"Ohio Hi-Point allowed me to try many new and exciting technologies. From building electrical systems to learning the basics of programming, I was able to experiment to find a passion in computer science and get a leg up towards succeeding in the future. I received my Bachelor's in Computer Science from Miami University and am now using the skills I learned from OHP and Miami at Amazon."

Robert Smayda '10
Amazon, Software Engineer

"My instructor has been an RN for years, and it's easier to learn the skills necessary for the medical field when your teacher has industry knowledge. I completed the Allied Health and Nursing program and passed the state test to become a State Tested Nurses Assistant (STNA) before I graduated high school, giving me a jumpstart on college and career pathways."

Alexis Christon '18
Wright State University,
Nursing major

"I was prepared for the real world after taking the Advanced Manufacturing satellite program at Triad. The learning curve wasn't as steep because I was able to gain experience while in high school. Even in college I feel more ahead in my classes. The program helped me get my foot in the door at ORBIS, and now they're providing tuition assistance as I work towards my degree."

Zack Zizzo '17
ORBIS Corporation,
Clark State Community College,
Mechanical Engineering major

We practice what
we teach.

Students put their education into practice and run several businesses on campus and within our satellite programs.

15
STUDENT-RUN
BUSINESSES

From coffee shops and school stores to oil changes and marketing services, here are just a few businesses students are putting on their résumés.

The Sloan Inn. Enjoy a delicious lunch prepared by our ProStart Culinary Arts students at the Sloan Inn. Catering for private parties in the Sloan Inn is also available.

Hi-Point Salon. Pamper yourself at the Hi-Point Salon where Cosmetology students offer cuts, colors, styling, manicures, pedicures, and facials.

The Daily Grind. Our Graham High School of Business students are fueling the mornings by running The Daily Grind, a coffee shop that applies business concepts directly to real-world learning.

Pirate Radio. Tune in to Pirate Radio, 91.7 FM the Buzz, at Riverside High School. Our Media Arts students are rounding up the latest news, sports, and weather for your daily commute.

The Legacy of Dr. Earl Sloan

Dr. Earl Sloan, in his Last Will and Testament, established the Sloan Foundation in 1920 and listed the Trustees to provide and maintain a school for teaching trade education to students in Logan County.

Setting the Standard for Advanced Technology

The Sloan Foundation is a vital supporter of Ohio Hi-Point and has pushed the career center to the front lines of advanced technology; providing robots, programming, medical equipment, digital technology, and much more to students who enroll in Ohio Hi-Point programs.

Dr. Earl Sloan understood the value of learning a career skill when he began an apprenticeship at the age of 15. He helped run a business with his brother selling liniment, a remedy for pain relief. By 1896, Dr. Sloan dedicated himself to the business that reached a volume of \$30,000 annually (which would be almost one million dollars in today's market).

After establishing the Sloan Foundation in 1920, funds from the trust were first used in 1948 at the Sloan Industrial School at Bellefontaine High School. In 1975, Ohio Hi-Point began the strong partnership that continues today with the Sloan Trustees.

The lasting effect of the Sloan Foundation can be seen throughout campus – in the Sloan Inn restaurant, the new state-of-the-art Dr. Sloan Smart Technology Center, and within our program labs and classrooms. Each year, staff and students host the trustees for a special event to thank the foundation and celebrate Dr. Sloan's legacy.

Ohio Hi-Point's mission is to develop our
most valuable resource – **people** – by
providing quality career-technical and
academic education.
