

\$55 and 15 Minutes = Peace of Mind!

Are you wondering about your heart health?
Do you have a family history of heart disease?
Do you smoke or have other risk factors?

A coronary calcium scan can help assess your likelihood of a heart attack.

Ogden Regional Medical Center is now offering coronary calcium scans to employees of Davis County School District for the special price of just \$55, no matter your insurance. (Regularly \$69)

The test is non-invasive and only takes about 15 minutes.
Your results will be mailed to your house within 10 days.

Coronary calcium scans measure the amount of calcification in your heart arteries to identify plaque build-up BEFORE it causes obstruction.
Peace of mind - for the special price of \$55 and 15 minutes of your time!
