

LAGUNA BEACH UNIFIED SCHOOL DISTRICT

ADMINISTERING MEDICATION AND MONITORING HEALTH CONDITIONS

BP 5141.21

Students

The Governing Board believes that regular school attendance is critical to student learning and that students who need to take medication prescribed or ordered for them by their authorized health care providers should have an opportunity to participate in the educational program.

Any medication prescribed for a student with a disability who is qualified to receive services under the Individuals with Disabilities Education Act or Section 504 of the Rehabilitation Act of 1973 shall be administered in accordance with the student's individualized education program or Section 504 services plan as applicable.

For the administration of medication to other students during school or school-related activities, the Superintendent or designee shall develop protocols which shall include options for allowing a parent/guardian to administer medication to his/her child at school, designate other individuals to do so on his/her behalf, and, with the child's authorized health care provider's approval, request the district's permission for his/her child to self-administer a medication or self-monitor and/or self-test for a medical condition. Such processes shall be implemented in a manner that preserves campus security, minimizes instructional interruptions, and promotes student safety and privacy.

In addition, the Superintendent or designee shall collaborate with city and county emergency responders, including local public health administrators, to design procedures or measures for addressing an emergency such as a public disaster or epidemic.

Administration of Medication by School Personnel

Any medication prescribed by an authorized health care provider, including, but not limited to, emergency anti-seizure medication for a student who suffers epileptic seizures, auto-injectable epinephrine, insulin, or glucagon, may be administered by the school nurse or other designated school personnel only when the Superintendent or designee has received written statements from both the student's parent/guardian and authorized health care provider

When medically unlicensed school personnel are authorized by law to administer any medication to students, such as emergency anti-seizure medication, auto-injectable epinephrine, or glucagon, the Superintendent or designee shall ensure that school personnel designated to administer any medication receive appropriate training, including CPR training for Epipen administration, and, as necessary, retraining from qualified medical personnel before any medication is administered. At a minimum, the training shall cover how and when such medication should be administered, the recognition of symptoms and treatment, emergency follow-up procedures, and the proper documentation and storage of medication. Such trained, unlicensed designated school personnel shall be supervised by, and provided with immediate communication access to, a school nurse, physician, or other appropriate individual.

The Superintendent or designee shall maintain documentation of the training and ongoing supervision, as well as annual written verification of competency of other designated school personnel.

School nurses and other designated school personnel shall administer medications to students in accordance with law, Board policy, and administrative regulation and shall be afforded appropriate liability protection.
