

# **HEROIC SCALE**

## **MAXIMUM SECURITY PRISON**

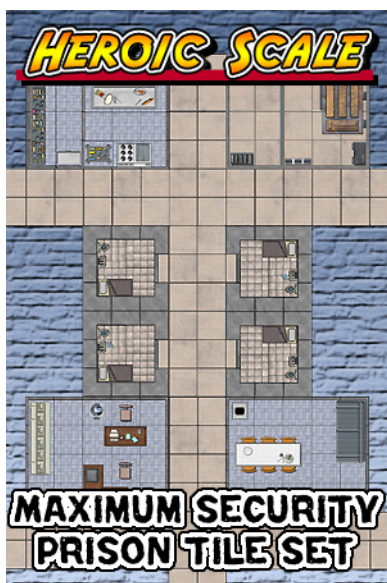

### **THE INTERROGATION ROOM**

MicroTactix Games  
www.microtactix.com

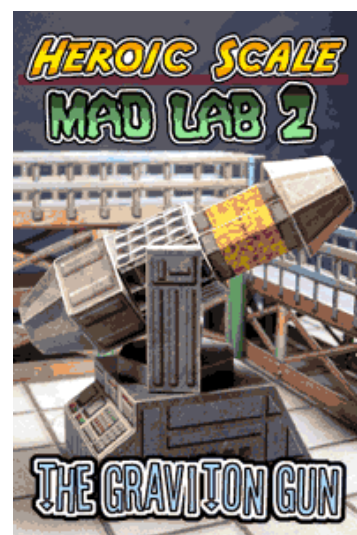

This free set contains all the material enough pieces to create an interrogation room that can be used as a stand alone piece or integrated into the Maximum Security Prison basic set as needed. For purposes of game play, it is assumed that a prisoner is brought to the interrogation room from his or her cell through a corridor at the rear of the room. The prisoner enters through the steel reinforced door in the back and instructed to stand on the platform at the center of the room. If necessary, the prisoner can be held in place on the platform by a series of stasis force field units located around the edges of the platform. A plastic polymer, floor to ceiling wall separates the prisoner from the officers in charge. The officers in charge can gain entrance into the interrogation area by way of the steel doors located at the left and right rear of the room. The interrogation control room contains 2 desks, 3 chairs and a security control panel. This panel controls the restraint platform as well as monitoring equipment for the interrogation room as well as the rest of the complex.

To assemble this set, cut out all pieces after printing on suitable cardstock. 110# cardstock is recommended for durability, but 65# will work as well. The floor tile can be glued to a heavier cardstock if desired. The furniture can be placed in the room as desired.
