

## Opening Speech-ACAMMUN for Jordan, Environment

Honorable Chairs, fellow delegates and distinguished guest,

The delegate of Jordan is honored to be invited to this ACAMMUN conference. Jordan has been one of the first countries to have started and almost completed a United Nations project on climate change and alternate energy resources. Hence, the delegate of Jordan will be focusing on the topic of climate change and alternative energy resources. Jordan would really like to help the world on this topic because Jordan has already had a project on this issue, the delegate has a resolution and hopes to merge with other delegates in this forum and hopes that this forum will have constructive debates and all the environmental problems of today will be solved with collaboration and negotiations between delegates.

**Note from West Lake MUN conference organizers:**

**Lobbying and merging will be complete by the time of opening speeches at West Lake MUN. In their opening speeches, delegates may refer to the resolution they have helped create, but they will not yet know, at the time of their speech, whether the chairs will pick their resolution for the debates on the following day.**
