Credit hours = 18			Credit hours = 15		

TOTAL CREDIT HOURS = 136

Completing the music education program in four years requires an abnormally heavy course load. Taking summer courses to fulfill some of the Bethel Core requirements is recommended to help ease the overall load during the traditional school year.

*These courses are not required for graduation but are generally considered necessary to pass the piano proficiency exam required of all music majors.

^These courses only required if a concentration in instrumental music education is chosen.
