

### **What is Schoology?**

Schoology is an online course management system that allows teachers to create and manage academic courses for their students. It provides teachers with a method of managing lessons, engaging students and sharing content. Schoology provides a secure and safe, easy-to-use, way for teachers, students, parents, and administrators to seamlessly communicate and collaborate to enhance students' learning and success.

### **When will I receive my parent code for Schoology?**

The access codes and instructions for creating your parent Schoology account will be sent home with your student. (Teachers will be distributing them over the next few days.) The instructions will provide a tutorial on how to create a new Schoology account, which will be automatically associated with your child. If you are a returning parent and do not need to sign up for Schoology or link to your student's account, please verify that you are still able to login and are correctly linked to your student's account.

### **What is the best way to view my child's progress in Schoology?**

To view a summary of your child's activity in Schoology and upcoming items associated with their courses, you may toggle between your account and your child's account. We highly recommend you login with your parent Schoology account and do not login with your student's Schoology credentials. Any parent/teacher communication should be done when logged in as a parent, not the student.
