

Request to Preview Materials

The Beaverton School District’s comprehensive health education program includes the teaching of the recently updated [Oregon Health Education Standards and Performance Indicators](#). These standards reflect medically accurate and age-appropriate content for each grade level. They emphasize the teaching of functional health knowledge that supports students in developing the essential health skills necessary to practice a lifetime of health and wellness.

The district has adopted instructional materials to support the teaching of these standards. The adopted materials went through a public review process prior to Board approval. Materials are available to preview at all elementary schools as well as the district office per ORS §336.465. If interested in previewing materials, please submit this “Request to Preview Materials” form to your child’s administrator.

I would like to set up an appointment to come in and preview the health materials

Please identify the curriculum you would like to preview:

The Great Body Shop fightchildabuse.org

Please identify whether or not you need an interpreter to assist you in previewing materials:

I do not need a translator I would like a translator

List the targets/lessons you would like to preview:
