

About Child Find

The goal of the William Floyd Special Education Department is to promote students' academic, physical and social/emotional growth in a safe, nurturing environment and to allow students an opportunity to develop all facets of their character to the fullest potential.

New York State Regulations require that each school district provide information to parents to assist them if they believe their child may be a preschooler or school aged student with a disability.

Do you suspect your child may have a disability?

We can help...

Response Form

Please fill out if you would like more information regarding the William Floyd School District's Special Education referral procedure, or the preschool referral procedure.

Do you suspect your child of having a disability?

The Office of Special Education provides a full range of services to all children ages 3 to 21 who have been identified and evaluated in accordance with IDEA (Individuals with Disabilities Act; PL.94-142). As such, when students have difficulty in school despite attempts at remediation through research based early intervention services, school personnel or parents can submit a request for an evaluation to the building principal or directly to the Committee on Special Education (CSE).

Parents and early childhood educators who are concerned about a preschooler's development can submit a request for evaluation to the Committee on Preschool Special Education (CPSE), which can be reached at (631) 874-1133. If there is a concern that a student ages 5-21 may have a disability which adversely impacts his/her education, a request for evaluation can be made to the Committee on Special Education at (631) 874-1133.

"Experts tell us that 90% of all brain development occurs by the age of five. If we don't begin thinking about education in the early years, our children are at risk of falling behind by the time they start kindergarten."
-Robert L. Ehrlich

Do you or your child's pediatrician have concerns about your child's:

Speech and language development:

How does your child communicate with others?

Social development:

How does your child play and/or interact with adults, caregivers and peers?

Physical development:

Does your child move about safely?

Academic development?

Does your child acquire academic skills when they're taught?

The answers to these questions may vary depending upon the age and developmental levels of your child.

Visit our website or call the Special Education Office for additional questions or to discuss areas of concern.

My child is less than three years old.
