## Homework Tips for Families

**To help ensure your child finds success with homework, there are many things you can do to help! In addition to modeling getting your own work done in a timely fashion and modeling organization, you can help children in many other ways such as:**

- Allow your child to re-energize themselves after school by taking a break, having a snack, or playing a game before beginning homework
- Create a routine for homework each night using the same time and place each day
- Encourage children to use planners to stay organized with assignments
- Have a set place for homework like a big desk with all necessary materials available such as pencils, paper, books, and calculators; make sure the area is free of distractions
- Sometimes a break may help with concentration during homework time
