

HONORS in Spanish

The HONORS in Spanish program enables students to expand their knowledge of Spanish language and culture by completing a research-based project using Design Thinking principles under the guidance of an advisor.

Prerequisites

HONORS candidates must be enrolled in or have completed a fourth year or Advanced Placement course in Spanish.

Honors Seminar

The *Honors Seminar* will be a solid two-term course in which candidates will have time to develop and complete papers or projects.

Honors Project

HONORS projects must be scholarly in nature, and will involve speaking, reading, listening, and writing components (reading, speaking and writing only in Latin). A student's HONORS plan must be approved by an advisor and the work defended in the target language before an HONORS committee.
