## SPARTAN WEATHER DAY 1<sup>st</sup> GRADE FLEXIBLE LEARNING ACTIVITIES

### ROCORI 1<sup>st</sup> Grade Families,

This year the district will be utilizing Flexible Learning Days if needed due to severe weather conditions that would close schools. This will be counted as your child's learning day. Below is the information on the Flexible Learning Days on what the expectations are for students, families, and access to teachers, should that be necessary due to inclement weather.

The goal of the Flexible Learning Day is to continue consistent and quality learning despite what the weather in the 2019-2020 school year has in store for us. The Minnesota Legislature 120A. 414 and the Minnesota Department of Education has guidelines for schools to follow in regards to Flexible Learning.

### **What is a Flexible Learning Day?**

A Flexible Learning Day refers to a school day when students, instead of coming to school, stay safely at home and communicate with teachers online or continue their learning through prearranged learning assignments. On Flexible Learning Days, teachers will hold regular office hours in which we will be available to provide learning support to students.

### **About ROCORI Flexible Learning Days**

In the event of a school closing due to inclement weather, students will be required to complete at least five activities on their Flexible Learning Board. Students should complete at least one activity in each subject or column of the board. If there are two consecutive school closing days, students are expected to complete an additional activity in each subject or column.

**Please sign and have your child return their Flexible Learning Board to their classroom teacher the next school day.** Thank you!

Sincerely,  
ROCORI District First Grade Team
