Cupertino Safe Routes to School

Working With Students

Cupertino Safe Routes to School has been honored to work as a technical advisor to young engineers! We have recently assisted three Lego League robotics teams, answering questions so that students can design machines that will address some of today's major transportation challenges. They will enter their designs into the First Lego League (FLL) competition, where they work to solve transportation challenges. Cupertino students have chosen to focus on bike and pedestrian safety around Cupertino schools. They recently contacted Cupertino Safe Routes to School to receive conceptual and technical advice. These students are incredibly passionate, and we look forward to highlighting their projects when they are complete!

Bike Rodeos

Cupertino Safe Routes to School delivered bike rodeos to 4 of our 8 elementary schools this fall, and we look forward to more in the spring. We partnered with SVBC to put on these successful after-school bike rodeos which teach kids bike handling skills and important traffic laws. If your school would like a bike rodeo, please reach out to us and we'll help you plan one.

Walk & Roll Banners

Over the summer we printed 10 new Walk and Roll banners for schools in Cupertino to replace old ones or, in some cases, to give a school their first W&R banner. If your school needs a walk & roll banner, please reach out to us and we'll provide you with a brand new one.

Infrastructure Updates

Carmen Road Bridge

The Carmen Road feasibility study was presented to council on Tuesday, November 5. To view a draft of the feasibility study, please visit <http://cupertino.org/carmenbridge>

Walk Audit Implementation

The City will open a second round of recruitment for a two-year limited term Assistant Engineer level position who will assist or lead the delivery of projects identified in Apple's \$9.8 million grant donation agreement. The first round of recruitment produced a candidate who we ended up hiring permanently to fill a vacancy in the Transportation Division due to our Associate Civil Engineer, Jennifer Chu, being promoted.

We have met with and finalized the walk audit recommendation list for two schools, have meetings scheduled with six more schools in November and December, are working to find dates to meet with the remaining six schools. Thanks to those who have given their feedback so far!

What's to Come

A portion of the planned Class IV bike lanes on Stevens Creek Blvd. and all of the Class IV bike lanes on McClellan have been funded for design and construction.

Stevens Creek Blvd.

Limits: Wolfe Rd. to Tantau Ave

www.cupertino.org/home/showdocument?id=13770

McClellan Phase II

Limits: Stelling Rd. to Torre Ave

Design: 35% Complete

Construction: June, 2020

www.cupertino.org/home/showdocument?id=13772

The Loop is a concept envisioned in the 2016 Bicycle Transportation Plan that consists of several off-street trail segments which, when combined with on-street connections, would form a bicycle loop around Cupertino. Click here for the bicycle transportation plan.

Via is Live!

We are excited to introduce Via-Cupertino, an on-demand shuttle service providing transportation anywhere in Cupertino and to the Sunnyvale Caltrain Station. The system features 10 new Mercedes Metris vans, each equipped with a bike rack and ADA accessible.

On-demand transit means no schedules or routes to remember. Instead a van travels to you and takes you to your destination. After requesting a ride, the app shows the van's location and wait time (usually 3-17 minutes). Riders walk a short distance to meet the van to make trips direct and fast. Once on-board, you make your way to your destination and along with other riders heading in the same direction. Mobility impaired riders can request door-to-door service. Half off for students!

McClellan Road Education

With construction on McClellan nearly complete, please reference the video below to better understand how to use the new green turn boxes at Bubb and Stelling.
