Saturdays 10:00AM – 12:00PM

Please Call for Price

### **10 Step Plan For Success:**

- Work on tests from at least two reputable books (Like Kaplan and Princeton Review – 5 practice tests).
- Work on finishing each section on time and effective use of time left after finishing the section.
- Understand what ACT expects in terms of answer choices and writing essays.
- Learn the concepts tested.
- Pinpointing weaknesses and working on them.
- Timed practice sessions to develop a pacing strategy for each section of the test, and practice to develop confidence and finish the actual exam in time.
- Memorizing instructions and getting into the habit of using the planned strategy/approach to each section.
- Plan on a study schedule with 30-60 minutes a day, two to five days a week (depending on time available for prep).
- Use free resources to learn/relearn concepts and to practice with tests.
- Full-length timed tests before the actual exam.
