

Hockey Pitch Plans at the Forefront of Pirrie Park Development.

The installation of two high quality playing surfaces will allow players from novice level to aspiring internationalist to develop their skills and abilities. This million pound project will be the first stage of the phased refurbishment of Pirrie that will include the installation of contemporary and accessible changing rooms, replacement tennis courts and the laying of a multi-sports surface to allow for general training, athletics and soccer to take place year round. These facilities will greatly improve the school's aim to promote the physical fitness, mental and social well-being of all of our pupils by instilling a lifelong enthusiasm for sustaining a healthy lifestyle.

For generations sporting legends have walked through the doors of the changing rooms at Pirrie to start their careers on our pitches. With your help we will be able to inspire the next generation of sports stars while widening participation and extending opportunity to all.
