Question /Comment:

(A) Timberland MS is a great new addition to the Cedar Hills area on the North of US-26 in the Northeast sub-region
The natural feeder schools to new Timberlands are: 1) Findley ES 2) Cedar Mill 3) Terra Linda 4) Bonny Slope ES based on the proximity

(B) This combination would be great from the socio-economic student body composition Findley has the least students taking free lunch (4%) and Terra Linda has 17% so net/net this will result in a good-mix of student body composition for Timberland

(C) By aligning to this feeder pattern with Findley, Cedar Mill, Terra Linda, Bonny Slope

Question /Comment:

Question: When BSD made the decision to build "Timberland" Middle school. What was the purpose and why that location was selected?

Comment:

1. Stoller is extremly overcrowded. Without changing the current elementary feeder schools [Jacob Wismer, Sato springville, Findley, Rock Cree] Situation won't improve.
2. From the current BSD data. [enrollment for all the elementary schools above, Capacity in the nearby Middle schools, travel distance. The most reasonable Solution is to move Findley to "Timberland" MS.
   * Spriville & Findley are the 2 biggest Feeder.
   * Findley is Next to "Timberland"
   * Spriville has to HOP over other elementary school IF Springville is to be moved to MS other than Stoller
   * Moving Spriville and neigbour elementar school ⇒

[Continue] from Stoller to other Middle school will over crowd any other Middle schools!

Recommendation: @ Move Findley (Family Seperates by the river. On the river side which is close to Stoller stays in stoller, Family on the other far side of the river. go to new Middle school "Timber Land"

(2) "Summa" can be considered to move to new MS school also

School(s) attendance area(s): Springville K-8, Stoller, Westview

Question /Comment:

Our family heard about the plan to change middle school boundary. We really hope we still could keep Stoller as our home middle school. The reasons as following: (1) Distance is the first consideration. It is 2.2 miles from Springville K-8 to Stoller Middle school. But it is much far away from Springville to Five Oaks, which is 4.5 miles. From the school district and families' point of view, the nearest is the best and also economical choice. (2) My older daughter has been dreaming and planning to start her middle school life in Stoller Middle school. Most of her older friends from our neighbor have been in Stoller MS. They've talked a lot about it. Although she has not started yet, she already loves Stoller MS very much. She has been working hard to try to get enroll with Summa program in Stoller MS. She hopes she could join her older friends together in Stoller MS. (3) After Stoller MS, they all will go to Westview high school.

Question /Comment: Springville - Arbor Oaks needs to stay in Stoller MS for a number of reasons. The MAIN ISSUE is the BUS → $$$ Situation. To get to Cornell from Kaiser and Springville is a good 15 minutes Around 3-6pm its a good 30 minutes. Considering HOW MANY students need to be bussed, our children will get home a good HOUR to get home. unacceptable!!! If you are so strapped for cash as a district the cost in extra busses — extra bus drivers, gas for busses. It is too far for parents to drive or kids to walk. The longer the distance for bussing the more disruptions and likelihood of having LATE busses, LATE kids to class missing instruction time. Once

Calculated over an entire school year you're talking Hours of missed instruction time. Secondly. people move to a home based on schools. TO uproot and move them to an underperforming school in the hopes of raising the test scores and give off the appearance that Five Oaks has improved isn't fair to the tax payers and voters of N. Bethany. The overcrowding issues are a struggle but Gerrymandering the boundaries is an unacceptable solution. Bottom line Springville must STAY AT STOLLER MS. NOT FIVE OAKS.

School(s) attendance area(s): Springville K-8

Question /Comment:

I just want my son to go to stoller ms, we lost Springville K-8 middle school option already. we want our next middle school option - stoller ms, we want the second less distance and all the kids from stoller will feed to west view highschool, if some of the kids go to sunset HS, they have to be seperated from their friends. We want minimum change !! we deserve minimum change!

We paid property tax (over $2,400 go to BSD) last year, BSD used the money to build the new middle school, it's a high technology green rated school, but for some reason, some parents refused to move to this wonderful new school and tried to kicked us out of stoller to somewhere around 5 miles away, BSD has to pay much more for transportation, and kids need to spend a lot of time on bus, what is the point ? just because the other schools parents think they have the privilege to do whatever they want to do, don't want to move to brand new fancy school, or they want to take summa program away who give them the privilege?

And the middle schwl they want [redacted] kicking us to [redacted] is almost full. [redacted] the other schwl's parents don't care how big effect that will be. they just want to keep themself in stoller ms they don't care how much that will cost [redacted] BSD. they don't care how many kids have to change their normal life. travel so far away. It is not fair !!

I [redacted] believe BSD will make fair decision for our kids. all the kids should have equal opportunity to get the best eduration servire.

School(s) attendance area(s): Findley / Stoller

Question /Comment:

It is irrational to even consider moving Findley out of the Stoller area considering fully 2/3 of the area already is not offered busing because it is too close.

We live right across the street from Stoller Stoller's southern door is our neighborhood's northern edge. It is no more logical to consider eliminating Jacob Wismer from Stoller than it is to consider eliminating Findley (Especially the neighborhood of Oakridge Estates just south of Loadlaw).

★★ A possible option would be to slice off our portion of the Findley ES area north of Bronson Creek and place that portion →

Antes Jacob Wismer has remained in Stoller MS area. This would keep the elementary kids together.

If this suggestion does not make sense, please call 773 771 5235 to discuss. (email mjjw30@gmail.com)

This would be a reasonable compromise solution. *

(Keep SUMMA at Stoller MS)

1) Bronson Creek & Findley north becomes part of Jacob Wismer because it is walkable to Stoller.
2) SUMMA stays at Stoller MS.

School(s) attendance area(s): I SON IN SPRINGVILLE.

Question /Comment: Dear Sir,

I noted with dismay that there have been suggestions to move springville to Five Oaks. Let me share why I dont think this is a good idea:—

1. Geography:— Springville is the North-West most school in the district. Stoller is the North West most middle school and hence logically Springville feeds to Stoller. BSD has spent millions creating additional capacity in MS level in the North-east in form of Timberland. Findley being the only N-E school feeding to the overcrowded Stoller is the natural candidate to move to Timberland.

2. Distances:— Five Oaks is 5.2 Miles from my home. This would mean that my son would spend 40-50 minutes (one way) in the bus. Numerous studies have shown that long commutes

negatively impact students academic & other life parameters like sleep, recreational activities etc.

3) Diversity → Springville and Rockcreek feed the highest number of Economically Disadvantaged ~~parents~~ Kids to Stoller. Taking Springville out is going to make Stoller less diverse.

4) Springville K-8 is also being phased out and hence there is no close option to Springville

5) This option while ~~seating~~ suiting Springville will be also least disruptive on all other schools

6) This option also keeps all the Elementary schools that feed into West View HS together and all ES that feed Sunset together.

School(s) attendance area(s): Springville K-8

Question /Comment: Dear BSD MS Boundary Adjustment committee

I am a parent for a kid going to springville elementary school, I think since springville K-8 is phasing out of MS this makes stoller is closest to springville school, Five Oaks being ~ 5.2 miles away, causing student to travel ~ 40 to 50 minutes one way, this would disturb other activities by impacting time availble for them, also during fall DST it will be too dark in the evening when kids reach home; Regrding feeder patterns from elementary, middle to high school, Findley goes to Susent while majority of others go to west view, so it makes sense to keep rest of schools going to West view together as a community. Springville is in North-west corner of BSD; Stoller is also in North-west corner so logically due to geography it makes sense for Findley to feed into Five Oaks & Springville ES to feed into Stoller; Springville & Rock creek feed higher numbes of economically disadvantaged kids to stoller, removing them will cause stoller less diverse. Thus Findley feeding into

Question /Comment:

- No one would be happy with changes. BSD needs to address how they are going to bring 5 oaks, Timberland to the same level of stoller. How can BSD make Sienna available to all these middle schools
- Everyone wants their neighborhood school. But with each middle school clearly at different level, neighborhood school is just a lost battle.
- What is the projection? Would the changes reach next capacity very soon? What really north bethany needs is another middle, in North Bethany
- When 5 oaks & Timberland reaches the same level as stoller, people will naturally drawn to them & alleviate stoller overcrowding problem. Same note as 1st, BSD needs to address these problem before deciding boundary.

Question /Comment: Please do not remove Springville from Stoller MS.
First, BSD took away the middle school status from Springville - that could have been our closest middle school. Now, Stoller is our closest.

If Springville feeds into Five Oaks, as suggested by some parents, it will lead to unreasonably long commute times for our kids. This will have an adverse impact on their extra-curriculars, homework time, down time & family time, all of which will have an impact on their academic, physical, emotional & social wellness.

We are at a geographical location where Stoller is our only viable option.

I implore the committee to come to a fair decision keeping this in mind, so that we set up ALL OUR KIDS FOR SUCCESS.

Portland (City) OR (State) 97229 (Zip)

Phone: 269 823 8484

School(s) attendance area(s): Springville/ Stoller/ Westview

Question /Comment: Currently Springville elementary kids feed to Stoller middle school. My suggestion is to continue with this arrangement because of the following reasons -

1. Stoller middle is the nearest middle school from Springville elementary area.
2. Stoller & Springville both are located in the NW part of BSD area.
3. If a different middle school is assigned, kids will have very long commute. They may need to cross major roadway.
4. Springville K-8 is being transitioned into elementary school only.

Crowding at stoller can be reduced by -

1. Moving the summa program to a different location
2. Feeding Findley Elementary school to Timberland middle school.

School(s) attendance area(s): Springville K-8 / Stroller / Westview.

Question /Comment:

1 - Timberline Feeder Schools: We need to fill the new MS & ~~its~~ 0 since we also have Cedar Park MS it is difficult to fill Timberline if we are not moving Findley ES. Even with Findley moving new school will be at deficit capacity & it is ~~will~~ within <3 miles.

2 - Growth Area - Springville area development is stable compared to SATO. SATO impacts more compared to Springville.

3 - Springville brings diversity, social-economic population when compared to Findley / Jacob / SATO.

4 - Springville K-8(5): will be just ES & we are losing walkable MS already & our next closest school is Stroller.

5 - Feeding pattern - Findley goes to Sunset high & the school ~~went~~

School(s) attendance area(s): SPRINGVILLE / STOLLER / WEST VIEW

Question /Comment:

With growth in North Bethany and no new middle school to feed into, Stoller is the closest option. (since) If Stoller is overcrowded, it pushes kids to attend schools south of where they live. The new middle school was not built in the growth area - Itenee elementary schools to the north has to feed into the middle school. We have to reduce the commute for the kids as much as possible. In order to keep a diverse student body composition Rock Creek + Springvilk should continue to feed into Springville. This also prevents the ripple effect of moving Springville to Five Oaks as Five Oaks is at capacity. Spriguille also removing the middle school option which reduce the middle school options in North Bethany area.

Question /Comment:

(1) I believe distance to school has a huge impact on kids attend school. Longer commutes, generally, tire students and they are less likely to be attentive at school or with homework assignments. This should be a key factor in deciding school boundaries. No other middle school is closer to Springville than Stoller.

(2) There should be fair representation of low income students in every school. Springville brings that representation to Stoller, as per available data.

School(s) attendance area(s): SPRINGVILLE K-8 SCHOOL

Question /Comment:

-> STROLLER MS -> ROCK CREEK, SPRINGVILLE, SATO & JACOB WISMER

-> TIMBERLAND MS -> BONNY SLOPE, FINDLEY, TERRA LINDA, & CEDAR MILL

-> LEAST DISRUPTIVE FROM EXISTING BOUNDARIES

-> NO ES TO MS Driving DISTANCE WOULD NOT CROSS MEAN BSD DISTANCE

-> SPRINGVILLE FEEDING TO STROLLER WILL MAKE DISTANCE OF 2.2 MILES

-> FINDLEY FEEDING TO TIMBERLAND IS 2.5 MILES

-> STROLLER MS DIVERSITY INCREASES IF FINDLEY IS FEED TO TIMBERLAND

-> SPRINGVILLE CANNOT FEED TO ANY OTHER MS AS THE DISTANCE IS >3.8 MILES ALSO SPRINGVILLE HAS TO CROSS ROCK CREEK OR FINDLEY IF FEED TO OTHER MS

-> SPRINGVILLE STUDENTS & PARENTS HAVE ONLY TWO HEAVY TRAFFIC ROADS TO REACH ANY NEAR MS APART FROM STROLLER.

WITH THIS OPTION STROLLER & TIMBERLAND WILL BE 90% CAPACITY

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

PORTLAND OR 97229

City State Zip

Phone: 9522170097

School(s) attendance area(s): Springville, Stoller

Question /Comment:

Considering the School boundary and least possible disruptions the following approach will be the best.

* Stoller – Rock creek, Springville, Sato & Jacob wismer

* Timberland – Findley, Terra Linda, Bonny slope, Cedar Mills

* Cedar Park – Raleigh park, Ridgewood, West Tualatin view, William wallace

This option will reduce the stoller capacity < 90%.

Though findley will have to go to new Middle school, it is hardly around 1.5 miles more compared going to Stoller School.

Specially aid disavntaged kids will get better chance in Stoller if findley goes to Timberland.

There will be more diversity in Stoller, if findley moves out of Stoller.

This option will cause the least disruption to everyone

* → findley has 68% asians

Springville has 40% asians, 42% white, 12% Hispanic

School(s) attendance area(s): Springville, Stoller, Westview

Question /Comment:

Based on the objective to keep Stoller MS capacity at ~~90%~~ 90% for future growth, and with least disruption to students, and adding new feeder schools to the newly built MS at Timberland, I propose the below.

Stoller MS → Rockcreek, Springville, Sato, Jacob Wismer

Timberland → Findley, Terra Linda, Bonny Slope, Cedar Mills

Cedar Park → Raleigh Park, Ridgewood, West Tualtin, William Walker

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Phone: 309-532-2767

School(s) attendance area(s): SPRINGVILLE ES, STOLLER MS, WESTVIEW HS

Question /Comment:

In order to solve for overcrowded Stoller MS and find feeder schools for the new Timberland MS. I think the following distribution of ESs achieves the desired BSD goals:

Stoller MS: Sato, Jacob Wismer, Springville, Rock Creek

Timberland MS: Findley, Bonny Slope, Terra Linda, Cedar Mills

Cedar Park MS: Ridgewood, Raleigh Park, West TV, William Walker

This distribution has the following benefits:

1. Keeps distance and commute times reasonable from ES to MS
2. Brings the occupancy down in Stoller
3. Feeds Timberland to the desired capacity
4. Maintains a healthy % of diversity.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

PORTLAND OR 97225
City State Zip

Phone: 503-501-6644

School(s) attendance area(s): SPRINGVILLE & WESTVIEW

Question /Comment: Based on proximity to middle school, Diversity at Middle school and least disruptions, we recommend the following boundary changes.

(1) Move Findley Elementary out of Stoller middle school. Findley is closer to newly built Timberland (BSD Spent-100 million $) to build this school. Based on Proximity, Findley E.S. should be assigned to Timberland.

(2) Keep Springville, Sato, J.W. elementary under Stoller. This helps improve diversity at Stoller. Currently diversity at Springville is 16% while diversity at Findley is 4% (economic). By allowing Springville to go to Stoller M.S., overall diversity thought factor improves & helps the Community to grow.

(3) Assign Rock Creek E.S. to 5-Oaks middle school as they are the closest to 5-oaks M.S.

(4) From a high school perspective, it makes more sense to assign Findley to Timberland as Findley kids go to Sunset H.S.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

While all other Elementary school kids @ Stoller go to Westview HS.

School(s) attendance area(s): Jacob Wismer - Stoller - Westview

Question /Comment: I would strongly suggest to leave the Summa program at Stoller, since most of the Summa students families live in the Stoller attendance area.

Looking at natural borders - I would suggest to leave Findley at Stoller and move Rock Creek, Springville and Sato out of Stoller (Bethany Blvd and Springville road natural boundaries). That's also the only way to reduce the amount of students to 90%.

I also hope that the district finds a bigger space to accomodate all the participants of the next meeting.

Thank you

Portland OR 97229

City State Zip

Phone: 971-295-0164

School(s) attendance area(s): SPRINGVILLE

Question /Comment: (1) Please consider the commute time for kids who are going to attend middle school. ~~Portland~~

(2) Timberland MS was buld to serve North east part of the Community. To make room in Stroller Timberland is the ideal Solution. ~~For~~ Out of the present ES attending Stroller Findley is the closest to Timberland and would be best to move Findley ES students to Timberland.

(3) Most of the SATO, SPRINGVILLE & ~~Rock Creek~~ Jacob Wismer ES. Students can Still have alternate options to ~~Commute~~ commute by bike or walk.

(4) have least distruptions in current boundries & give importance to commute time.

(5) Looks like most of the ES & MS are getting to 100% Capacity. BSD needs to work with City planning and control the expantion or have more capacity Created

Question /Comment:

The BSD public hearing is extremely helpful. — Appreciate the Board's dedication & time.

As a Professional Engineer (PE) practicing transportation Engineering, I find all three themes creating a situation where north-south commute for school is more prevalent. This is usually against transp. planning principles, as we would like to minimize the total distance from participants (students) to the activity center (schools). Major streets like West Union are natural boundries for rezoning schools. As such, what I see most logical is to break the N-S commute pattern, for example, US Hwy 26 as another natural border for zoning.

The above has been said by many parents, but I hope the suggestions are useful input to the Board's decisions.

School(s) attendance area(s): Rock creek

Question /Comment: Rockcreek, Sato, sprinvill, Jacob wismer go to stoller M.S.

I ~~believe~~ beliene following factors need to be considered:

1). commute distance. For student living Northside, it does not make sense to travel far distance for middle ~~sc~~school in the south area.

2) Diversity. Having diversity is very important for kid's growth and social skills It also help students to develop an open mind The combinaton of Rockcreek, sprinvill, Jacob wisme & Sato can provid good diversity

3) Safty: For most students in Rockcreek, they will need to cross the major corridior to reach five oaks M.S. This is not safe for students.

Portland (City) OR (State) 97229 (Zip)

Phone: 503-778-0237

School(s) attendance area(s): Springville K-8

Question /Comment:

My name is Fred Zhou. I live near Springville K-8 school and I have two daughters attending Springville K-8, the first and the third grades.

I am here to attend "2019 Middle School Boundary Adjustment Process" meeting. I am disappointed at the fact that BSD would cancel Springville K-8 school as a middle school due to the over population at Bethany area. I am even more disappointed at the prospect of students near my neighborhood would be shipped across school boundaries to Five Oaks school which is almost 5 miles away from my house.

In the spirit of close proximity and traffic safety, I urge BSD board to reject any proposal to move students from the Springville school area to Five Oaks middle school.

Thank you for your consideration!

Sincerely,

Xiaoyuan Zhou

School(s) attendance area(s): springville k8 / stroller/ westview high

Question /Comment: For new school Boundary adjustment. in order to keep all schools not exceed Capacity, highest Proximity and Diversity. I think maybe we can divide Findley into half. half merge with springville and go stroller. the other half join Bonny slope / Terra Linda / Cedar Mill to go Timberland. Rock Creek and Bethany (south of west union) go Five oak

in this plan, the over Capacity stroller Middle school may keep 88% filled, while keep Proximity and Diversity same.

We cannot keep ~~Findley~~ Findley in one piece. It is because it only has less than 5% students take Free Lunch. they must join with other Community to ~~maintain~~ keep ~~the University~~. ~~good~~ Diversified!

School(s) attendance area(s): Oak Hills, Meadow Park, Sunset

Question /Comment:

→ It would put my parental mind at ease to have easy access to my children's schools - for daily commute, during inclement weather or during emergencies. Currently to access Middle school we must cross Hwy 26 + weave through some pretty gnarly traffic. Ideally we'd not have to cross Hwy 26. I realize this may not be possible but that is my hope + I'm sure the hope of others. This would mean we'd go to Stoller or the new Middle School.

I also like the idea of feeder schools staying consistent - all students at a middle school go to the same high school. Same with elementary school → middle school.

Phone: 845-537-7818

School(s) attendance area(s): Spring Ville ES

Question /Comment:

For Spring Ville and Sato students, the nearest Middle school is Stoller MS, (within a circle of 2 miles) this will minimize the traffic and unnecessary commute distance.

Sending Spring Ville and/or Sato across the HWY-26 (so far, the only option that do not let them go to Stoller MS) is not an effcient solution. I personally drive on Spring Ville dr and 185th Ave on everyday commute, which takes about 20min two years ago but now about 40mm (doubled time) — at the same time of a normal day and on the same route. I don't think the Spring Ville and 185th Ave. can be widen any furtler. The only way I see to keep the traffic at bay is having Spring Ville and Sato students continue going to stoller MS.

I add up the enrollment of Spring Ville, Sato, and JW — I get a total number that matches the enrollment limit of Stoller MS. I think Fredley area can be splitted geographily by the power lines, and the north part can be added to Stoller MS.

Phone: 312-860-4620

School(s) attendance area(s): Springville K-8 School

Question /Comment:

Bonny Slope, Cedar Mills, Terra Linda → Timberland

William Walker, → Cedar Park

Rock Creek → stroller

Springville → stroller

Splitting Findley 80% → Timberland, 20% → stroller (~~Proximity~~ reasons)

(Bronson Creek can be the splitting point)

1) Utilization of capacity will still be under 90%

2) Average distance of Elementary school to Middle school throughout BSD is 1.9 miles

3) Maximum distance throughout BSD is 3.8 miles

Springville going to stroller will bring more ~~special~~ Economic diversity

4) Springville → Stroller 2.2 miles | Findley → Stroller 1.2 miles

Springville → Timberland 5.6 miles | Findley → Timberland 2.5 miles

Springville → Fire Oaks 4.5 miles

5) Special aid Economically kids will move out of Findley to Timberland

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

6) 20% of ~~Stroller~~ Findley will remain in Stroller since kids staying closer can walk or bike to school.

Phone: 503-544-6989

School(s) attendance area(s): SPRINGVILLE & STOLLER

Question /Comment: Maintain the below feeding mechanism

Spoingville, ROCK CREEK → stoller, Terra Linda, Findley → Timberland

Pros & CONS with this approach

→ ~~keeping~~ sending Findley to Timberland it makes the less disruptions to boundary chang

→ makes stoller more diversified as Findley has less econic/discounted meals % than SPRINGVILLE

→ commute times will not be much worse to findley. If move spoingville it will be >5 miles

→ spoingville was overcrowded the last couple of years due to no other elemantary school. These kids didn't receive quality education & moving them to Five OAKS makes worse. Also against to BSD Polic

→ stoller is already rich scool in BSD, keeping Spoingville at stoller makes it more diversified

→ spoingville to Five oaks is more than 25% commute than the current longest feeding schools → middle schools

School(s) attendance area(s): Springville K-8 School

Question /Comment:

Rock Creek, Springville → Stoller

William Walker → Cedar Park

Bonny Slope, Cedar Mills, Terra Linda → Timberland

Splitting Findley 80% → Timberland, 20% to Stoller

Currently maximum distance throughout BSD is 3.8 miles.

Utilization of capacity will still be under 90%

Distance:

Springville → Stoller 2.2 miles	Findley → Stoller 1.2 miles
Springville → Timberland 5.6 miles	Findley → Timberland 2.5 miles.
Springville → Five Oaks 4.5 miles	

* Springville going to Stoller will bring more economic diversity

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Question /Comment:

keep the below feeding

Springville, ROCK CREEK → stoller

Findley → Timberland (

William walker → cedar park

Bunnyslope, Terra linda → Timberland

→ Pros - keeping Springviller at stoller & sending Findley to Timbe

~~Keep~~ maintains diversity in stoller

School(s) attendance area(s): Springville School.

Question /Comment: Distance: I would like to have MS near by so, that if any emergency @ school then parents can reach the child quickly. It's very important to keep the students safe and near to the parents reachable.

That beeing said, the more near to the home the more safe the parents feel of their child.

The distance of the school also help the families to drop the kids to school ay to pickup from the school if child is sick.

-> Springville, Jacob, sato -> Stroller

-> Findley, five oak, Bethany -> timberline.

-> Rockcreek, oakes -> Fiveoaks.

overall, it will make more sence to move the Bs to nearest school of MS -

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

School(s) attendance area(s): SPRINGVILLE, STOLLER, WESTVIEW HS

Question /Comment:

~ Distance from Springville neighbourhood to Five Oaks (4.5 miles) is much more than to Stoller MS (2.0).

~ Springville neighborhood Students is more diverse than Findley ES this will give the students better exposure to Students from all economical background and ethnicity.

~ Stoller MS being closer to Springville neighborhoods allows parents to reach / drop / pick up students in much shorter time. This will greatly help in case of emergencies due to weather / otherwise.

~

Considering the above comments

I urge you to consider keeping Springville feeding Stoller middle school

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

School(s) attendance area(s): Springville K-8 school

Question /Comment:

We have moved to springville K-8 neighbor hood 3 years ago. My son goes to springvilled and my second son is getting ready to join Springville. Recently BSD has made springville K-8 to K-5 school. This has caused us lot of pain as the school is within walking distance for us. ~~Now~~ ~~here~~ ~~are~~ Please keep the distance of the kids commute between 2-3 miles average. Dont make some kids go 5 miles to get to middle school. With the traffic increase in the area making kids travel one hour each way is not ~~good~~ good for thier mental and physical health.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Address: 17035 NW Viola St

Portland OR 97229

City State Zip

Phone: 206 450 7367

School(s) attendance area(s): Springville ; Stoller ; Westview

Question /Comment: The following proposal

1). split Findley by 80% and 20%. 80% feeds Timberland, and 20% (the area across Laidlaw within walking distance to Stoller) to Stoller. Feed Terra Linda, Bonny Slope, Cedar Mill to Timberland will meet the capacity of Timberland.

2) Feed Springville, Sato, Jacob Wismer to Stoller which will reduce the enrollment at Stoller to 90% of Capacity and keep a very good diversity of Student body at Stoller

3). Findley and Jacob Wismer both have the lowest % of free/reduce priced Lunch. 5% is significantly lower than other ES. They can not feed into the same middle school. That's why Findley goes to Timberland will benefit the diversity at Stoller and Timberland.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

PORTLAND (City) OR (State) 97229 (Zip)

Phone: 435-680-1607

School(s) attendance area(s): Springville Elem. / Stoller M.S.

Question /Comment: Map Three 1 (one) is the best option for Springville. It is the shortest distance for travel time for Springville students to go to Stoller, not to mention it is safer. ~~[illegible]~~ When there is bad weather & cars & buses can't travel it is within reasonable walking distance for parents to at least be able to walk to get their children. Whereas other schools ~~[illegible]~~ i.e. commute from Springville to Five Oaks time is more than double. This also takes away from the amount of sleep our children will get ~~[illegible]~~ which is very vital to children of Middle School age. They shouldn't be spending one plus hour per day traveling on a bus, when Stoller is significantly closer. Other proposals are to keep 6th grade at the elementary schools to decrease M.S. size. & the best option is to build another middle school ASAP within a few years rather than 10+ years because the crowding is just going to continue to grow with more-ins.

School(s) attendance area(s): Springville

Question /Comment:

School boundry should be decided based on distance and there should be minimal disruption in the current boundary. ~~Nto~~ No ~~shall~~ student should commute for more than 4-5 miles. for the middle school. Timberland middle school is close to Bony slope and Findley elaventory therefore these two schools should attend Timberland middle school.

Springville must be under stroller middle school since it is the closest middle school.

School(s) attendance area(s): Springville K-8 School.

Question /Comment: As a parent I would like to bring attn to BSD that it made us so tough to think through the proces & adjusting the boundary for M.S. So we have gone through the criteria, & to meet BSD objectives we followed least disruption path, less travel time, more safety, Proximity, Visinity, and Economically disadvantaged kids, demographics, to ease the Stroller capacity & to feed the timberland. I & we (North Bethany) recommend that by moving Findley to Timberland, we can achieve all the objectives and Ease the Stroller crowd. So it also satisfies that Springville North, Northwest Schools feed to Stroller & High School attendance is also not disreptive. and also we wan wanted William walker to Cedar park, So it will be a community Bonding. And we request BSD to introduce Summa program in Timberland.

Sato, Springville, Rock creek to Stroller.

Findley to Timberland.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Address: [redacted] TWINBERRY LN.

PORTLAND OR 97229.

City State Zip

Phone: [redacted]

School(s) attendance area(s): SPRINGVILLE

Question /Comment:

- There should be minimal disruption to existing boundaries.
- Distance impact should be minimal → Closest ES to Timberline should go to Timberline; no more travelling distances.
- Feeder school pattern [from ES → [redacted] → MS] should be consistent. e.g. Springville → Stoller → Westview. All Stoller should feed to Westview; all Springville should feed to Stoller.
- Student ratios: The student body composition should not be skewed by this redrawing; the economically disadvantaged, racial diversity should not be skewed in one direction.
- Commute times and distance travelling across the Highway 26 should be under consideration.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Address: [redacted] VIOLA ST

PORTLAND (City) OR (State) 97229 (Zip)

Phone: 503 501 [redacted]

School(s) attendance area(s): Springville, Stoller

Question /Comment:

Springville should continue feeding to Stoller. Five Oaks is too far and different community. Kids wont be able to bike there and bus route will not comply with BSD guidelines for 45 mins or less. Also any bike rider crossing HW 26 will be dangerous. We dont our kids dont go to classes near five oaks, we dont go to library there, shop there, go to parks there, our state legislators are different, so south bethany kids belong in Stoller not Five Oaks.

School(s) attendance area(s): Springville, Stoller

Question /Comment: first of all thanks for arranging these input meetings.

I propose the only logical action for feeder schools and that is Springville, Sato, rock creek, JW feeds into Stoller. Findley moves to Timberland. William Walker moves to Cedar park

I see this has lot of Pro's than Con's.

PROS - first & foremost: Stoller remains within acceptable capacity.

- Least disruption - only 2 schools impacted & +ve impact to William Walker.
- Commute times/distances remain in acceptable limit
- diversity, economical, no bias on commute time of one vs other community.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

School(s) attendance area(s): Findley Elementary

Question /Comment: For Middle school new boundary proposal: North Bethany is growing very fast. Washington County has master plan for noth Bethany which is growing fast. So, there is a need for new middle school in north Bethany. Findley community is not growing as Springville or Soto community. Keeping Springville and Soto will cause more and more problem as it will increase more students to stoller. For the current condition Findley should stay in stoller.

Are you a BSD Student? Yes (No) (circle one)

Address: 14100 SW Northview Dr

Tigard (City) OR (State) 97223 (Zip)

Phone: 503-913-3966

School(s) attendance area(s): Nancy Ryles, Conestoga, Mountainside

Question /Comment:

1) Our elementary school feeds to two middle schools. It would be really nice if new boundaries could minimize how much kids are split up.

2) Many of the middle schools have had severe cuts to their music programs. We are fortunate that Conestoga still offers daily band. If boundaries are adjusted, how will you make sure the educations are equitable among students? Will band be returned to daily education?

3) As middle school is so full of transitions already, we would like to have any students who have already started at a school not have to change schools.

Portland (City) OR (State) 97229 (Zip)

Phone: 503 724 1351

School(s) attendance area(s): Springville Elementary School, Stoller MS, Westview HS

Question /Comment:

My daughter attends Springville ES and we are now part of Stoller MS. Stoller MS is the nearest Middle school for us and the Commute time is less than 10 mins. Our neighborhood is north of Springville school and it is not a viable option for my kids go to Five Oaks or Meadow park School. Commute time for those schools is more than 30 mins for us and these schools are South of US26. It doesn't make sense to move Springville out of Stoller and to assign to any other school. New Timberland MS is near to Findley and it makes more sense to move Findley ES to new Timberland MS.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

School(s) attendance area(s): FINDLEY / STOLLER

Question /Comment: The Findley neighborhood is within 2 miles of Stoller MS (the farthest home in Findley is 2 miles from Stoller. Conversely - even the nearest home in Findley is 3.1 miles away from Timberland MS. This means that every single student from Findley will have to be bussed to the new MS. V/s more than 60-70% in a walkable area to Stoller currently. In addition Findley is actually decreasing in enrollment projections year to year → so moving Findley out of Stoller while keeping neighborhoods (SW/Sato) that are growing in Stoller does not fix an overcrowding at Stoller. The school district needs to seriously consider a new middle school in the North Bethany area to alleviate the explosive & high density growth in that region. It does not make sense to move established, close neighborhoods out of Stoller for a problem that has been created due to improper planning. Finally, the committee must consider keeping walkable neighborhoods in Stoller - even if it means split feeder patterns.

City State Zip

Phone:

School(s) attendance area(s): SPRINGVILLE K-8

Question /Comment:

In order to meet all the objectives, it makes sense & logical to Keep Springville K-8 Kids to ~~mid~~ Stoller MS. Springville ~~is~~ is the Integral part of Bethany & most of our ~~Ex~~ Kids extra-curricular activities are located at Bethany village.

It would make better sense to feed Findley school to New (Timberland middle school) as this school is much closer to Timberland than Springville. ~~To~~ moving Findley (Free lunch ratio 2%) to New School will also help maintain diversity. ~~against Spring~~ FYI, diversity of Springville is 14%. This is also less disruptive ~~to~~ to other School communities.

It is also safer for our Kids to go a Stoller MS ~~school~~ which is like meeting ~~other~~ most common Commute times.

School(s) attendance area(s): FINDLEY, STOLLER SUNSET

Question /Comment: WE REQUEST THAT FINDLEY FEEDING INTO STOLLER IS NOT CHANGED DUE TO FOLLOWING REASONS

(1) FINDLEY BOUNDARY IS TOUCHING STOLLER

(2) FINDLEY Families are WITHIN 0-1.2 miles from stoller

(3) NEIGHBORHOOD & PROXIMITY HAS TO BE GIVEN FIRST PRIORITY

(4) NEW GROWING AREAS IN NORTH BETHANY CAN NOT FEED INTO STOLLER AT EXPENSE ON NEIGHBORHOOD FINDLEY SCHOOL.

(5) NEW GROWTH AREAS NEED A PLAN WITHOUT DISTURBING EXISTING Neighborhood feeding schools.

School(s) attendance area(s): Rock Creek, Stoller

Question /Comment: Stoller MS is within walking distance of my home and community. Five Oaks is 3.5 miles away, across the freeway. We have no community and no legacy in the Five Oaks area. We have helped make Stoller what it is. It is wrong to push our children out to a school where we have no connection, no history, and no desire to go. Rock Creek contributes diversity and equity to Stoller, which are part of BSD's core values. Rock Creek must stay at Stoller, it's neighborhood school, where it has history and should have a future!

School(s) attendance area(s): SPRINGVILLE

Question /Comment:

Stoller is the closest Middle School to Springville Elementary. The travel time is shorter to the Stoller middle school. By keeping springville with Stoller helps kids save travel time and participate in other activities. This also helps keep kids safe by avoiding travel time. By keeping springville with Stoller, it also helps shifting of boundaries very less and also keeping the count in control with Middle schools.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

School(s) attendance area(s): Bethany / Sato.

Question /Comment:

It is totally unacceptable to change Sato, Springville, Findley & other highly rated schools to a mediocre Five oaks school which has a rating of 4 out of 10. Stoller may be overcrowded but it's very high rated 8 out of 10. People who pay a lot of taxes & BSD wants to transfer high calibre student to poor performing School. This is totally unacceptable.

Please build another high rated middle school or improve ~~Poor~~ Five oaks dramatically to be comparable to Stoller middle school.

School(s) attendance area(s): FINDLEY / STOLLER / SUNSET

Question /Comment:

Findley ES students shall be fed to Stoller. My home is less than 0.5 miles from Stoller. My older kid went to Findley & Stoller. My younger kid is 4th grader at Findley. He can easily walker to Stoller in less than 10 min. He will be really sad if Findley students will be fed to other middle school.

In addition, it will cause lots of inconvenience for Findley parents and families. On top of it, the change of school boundary will cause lots of traffic and safety issues to the local communities.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Phone: 213 399 4359

School(s) attendance area(s): Springville

Question /Comment:

We propose the folloing plan: Timberland <-- BS, CM, Findley (80%), TL; Cedar Park <-- RP, RW, WV, OW; Stoller <-- RC, SK8, Sato, dW, F (20%, proximal)
= Springville

why?

① Diversity. Springville has a diverse student body, which can benefit Stoller.

② School capacity: This proposed plan puts Stoller at 100% capacity and Timberland at full capacity. Great use of resource.

③ feeder pattern: Findley feeds to ~~Westf~~ Sunset, which is closely tied to Timberland, not Stoller.

④ proximity: this plan has minimal change, lowest transportation costs for BSD.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments

Portland OR 97229

City State Zip

Phone: 503-457-7458

School(s) attendance area(s): Springvill

Question /Comment:

I think the realigned BSD MS boundary should look like this:

Stoller: RC, Springville, Sato, JW, Findley (20%, closest to Stoller).

Timberland: BS, CM, TL, Findley (80%, majority)

Cedar Park: RP, RW, WV, WW (FULL).

I think this plan is consistent with BSD criteria, such as: minimal ~~boundary~~ change for the whole district; Stoller at its full capacity (not over-crowded); good use of the new middle school; and minimal transportation costs.

School(s) attendance area(s): Stoller MS

Question /Comment:

(1) The new middle school is in the North East Sub region closer to Cedar Mill ES, Findley, Terra Linda, Bonny slope. These make the natural & logical choice as feeder School. Why is BSD trying to redraw all other boundaries??

(2) There are proposals in the website which is created without any data points supporting those. What is the process BSD is following to have a bias free decision making?

(3) Based on distance, Socio economic mix in Stoller, it would make Sense to consider either Findley completely to the new MS or split at bronson creek & westmoor to keep less crowd in Stoller. This means Findley & Rock creek might be split btw two middle schools.

(4)

School(s) attendance area(s): FINDLEY

Question /Comment:

FINDLEY ELEMENTARY SHOULD FEED INTO STOLLER. REASONS BELOW.

- MAJORITY OF FINDLEY STUDENTS LIVE WITHIN 1 MILE OF STOLLER.
- FINDLEY HAS HISTORICALLY BEEN FEEDING INTO STOLLER WHICH MEANS WE HAVE NUMEROUS SIBLINGS GOING TO THESE SCHOOL. IT MAKES NO SENSE TO BREAK THE BOND.
- RE-ADJUSTING THE BOUNDARY IS PUSHING CAR DOWN THE ROAD. REAL SOLUTION IS TO CREATE A NEW MS @ NORTH BETHANY
- JACOB WISMER CAME INTO EXISTENCE BECAUSE FINDLEY WAS OVERCROWDED
- NO SCHOOL IN PLACE WITH SUMA & FINLEY KIDS DESERVE TO ~~NEED TO~~ MAINTAIN THE SAME DECORUM.

Question /Comment: I go to FINDLEY NOW

We want TO go to Stolley in middle school

Historically FINDLEY is feeder to Stoller

The communities / Neighborhood is built all along for 20 years in that way.

The new schools she and neighbourhoods should have new middle school and not disturb existing harmony

Also new neighbourhoods keep growing and even considering that new schools should be planned for them.

The existing FINDLEY → STOLLER feeder should continue.

FINDLEY is very close to Stoller and many people walk to school

Phone:

School(s) attendance area(s): Springville Elementary School

Question /Comment:

- Appreciate the initiative to open new Middle School
- For school kids, proximity to school & commute time is a key factor which determines the amount of free time available
- The other important factor is occupancy of the schools.
- Considering these factors the most logical will be:
  * New Middle School (Timberland) : Bonny Slope ES, Cedar Mills, Terra Linda, Findley (75%)
  * Stoller MS : Jacob Wismer, Springville K-8, Sato, Findley (25%) which is close to Stoller
  *

This proposal helps to keep kids in close proximity to school & also addresses school occupancy

- Was "shocked" with boundary maps from Nov 5th meeting where proposal was to move Springville K-8 to Five Oaks which is ≈ 5 miles
  ↳ This seems unreasonable as kids have to travel long distance

With above proposal all ES have optimal proximity to MS.

Phone: 5034304510

School(s) attendance area(s): Stoller

Question /Comment: To feed new middle school Cedar Park Elementary, Raleigh park Elementary, Terra Linda Elementary are the most likely candidates due to their proximity. Next in line is Findley elementary Unfortunately, all these middle school are too far from Elementary schools up north. Schools like Springville and Sato are already far from nearest middle school, hence those schools should not be disturbed. Findley if removed from stoller along with other Elementary schools mentioned above will strike the right balance, in terms of proximity, economically disadvantaged students, demographics, racial diversity etc. Jacob Wismer & Findley are the richest families feeding stoller. We should be creating schools with economic diversity. If new school gets findley kids it will be very exciting times for them in new school.

Question /Comment:

I currently have two kids in Springville K-8 Elementary School. Our neighborhood is very close to Stoller Middle School. And the kids in our neighborhood have the tradition to go to Stoller Middle School.

It is no nessasary and wrong to change our neighborhood to other Middle school. There are some reasons.

First, Stoller Middle School is the one closest middle school in our neighborhood. If change to other school, the kids will spend too much more time on transportation everyday.

Second, our ~~st~~ neighborhood is the feeder of Stoller Middle School, and also all the kids will go to the Westview high school. It is good for all the kids know each other. For the kids, they feel comfortable when they know each other well.

In conclude, ~~th~~ our neighborhood (Springville) should keep in Stoller Middle School.

Question /Comment: As a student parent. I am glad to see a new middle school added to BSD. and sincerely hope it will ~~so~~ alleviate the overcrowding situation in Stoller and other middle schools in BSD.

I suggest to have the following elementary schools go to the new middle school: Findley. Terra Linda. Bonny Slope and Cedar Mills. ~~The 4 schools~~ The 4 schools are ~~the ones~~ close to the new middle school. and this option has the following advantages:

① makes best use of the new middle school: 95% of permanent capacity ~~filled~~ ✓ after adjustment. the new middle school has

② reasonable commute distances for all BSD families

③ balance percentage of students from low-income families: currently ~~Find~~ among the 5 elementary schools in Stoller, Findley & Jacob Wismer have lowest percentage of students qualifying for free lunch. Moving Findley to New middle school will create a more balanced. diverse. ~~body of~~ student body composition.

④ better feeder pattern: after adjustment. all students in new middle school go to Sunset HS. almost all (except for ~~some of~~ Jacob a small portion of Jacob Wismer) Students in Stoller go to Westview.

Kids don't need to be separated from their friends

Portland (City) OR (State) 97229 (Zip)

Phone: 480-241-0094

School(s) attendance area(s): Springville School

Question /Comment: I have questions and comments on all the factors that gets used to determine the school boundary.

Neighbourhood proximity and accessibility: If the springville school gets moved to Five Oaks Middle school, the distance increases to 4.5 miles. In fact, from my home, Five Oaks Middle School is 5.3 miles. If we stay with Stoller, the distance stays at 2.2 miles. No kid should be travelling more than 5 miles and cross a highway to reach middle school. Diversity and Equality: It is highly important for quality education. 13% of children applies for free meal in Springville. Whereas only 1% of Findley kids was free meal. ~~This~~ ~~Tha~~ If Springville stays with Stoller, diversity and equality will be maintained. Also, Springville ranks in the top 10% of Oregon school for diversity. Whereas Findley ranks in top 20%. Springville have more diverse & economically disadvantaged kids. I

School(s) attendance area(s): SPRINGVILLE, STOLLER, WESTVIEW

Question /Comment: New middle school boundaries are definitely needed. Currently, only option closest to springville are Springville MS and Stoller MS. Springville MS is phasing out starting next year. Moving Springville ES out of Stoller MS area to any other MS will be hugely disruptive ~~from~~ for community in terms of distance ~~to~~ from neighborhood to other MS. Geographically, the least disruptive option for all of BSD kids ~~is to~~ needs to be considered. Also, kids feeding patterns to MS and HS is also critical. Moving Findley ~~out~~ to new Timberland MS ~~into~~ along with few other ~~neig~~ nearby ES (Bonny Slope, Terra Linda & Cedar Mill ES) will ensure those kids ~~go to~~ stay together in MS and HS (Sunset). This satisfies multiple criteria set forth by BSD for this ~~re-b~~ boundary change process.

School(s) attendance area(s): Springville

Question /Comment:

Springville had K-8 option which ended. So now the nearest Middle school for Springville is Stoller. the next closest Middle school is Five Oaks which is 5-6 miles and no other community in the BSD has to commute this much distance in the current Boundary as it exist today. So Springville must continue to go to Stoller. Also, other communities like Findley, Rock Creek form Stoller have the option to go to other middle school Timbeland (for Findley) and Five Oaks (for Rock Creek) and still they have to commute less than 3 miles which is at par with many other communities in BSD.

So Springville shall continue to go to Stoller.

School(s) attendance area(s): Springville school

Question /Comment: Based on proximity and student composition data it seems moving findley to new Middle school (Timberland) will solve both the objectives. findley feeding into Timberland will help filling attendance for timberland area and at the same time will help to limit over crowdness at stroller.

This is the least disruptive proposal at requires very limited change and serve all the objectives.

Option ~~for Timberland~~ Timberland - cedar mills, Findley, Terry lind, Barney slope

Stroller ⇒ Springville, sato, Jacob and Rock creek

Question /Comment: We our kids are in Springville School Studing 3rd and 5th grades.

- we have been looking for our kids middle school as close as to our home which helps kids to go school within Minimum time
- The will be safe avoid maximum travelling time
- close to our home, if Something happens we will reach school as fast as
- If we need to drop kids it will be easy for us to drop and go office.
- It will give less transporton time and with this kids get Study time and playtime
-

School(s) attendance area(s): Springville

Question /Comment:

We moved to our house 2 and a half years ago. We were told we had two choice for MS. However, Springville is taken 6-8 away. We didn't make that decision. Now, new middle school is open and we are too far away from that. We hope it is fully functioned for the kids around it — Cedar Mill, Terra Linda, Bonny Slope, Findley and West Tualatin. In this case, Stoller will have enough room for the growth of the north area before another MS is built. ~~For~~ That's the best for all the kids and the community. Please think the whole thing based on the school board Policy Factors for the Boundary Adjustment.

School(s) attendance area(s): springville elementary school, stroller, westview

Question /Comment:

@. We live in Abbey creek. Just north of springville elementary school. ~~My~~ daughter currently goes to springville elementary and she is ~~test~~ excited and looking forward to attend stroller middle school. there are many reasons to justify springville elementary school feeding into stroller middle school. springville elementary school is proximity to stroller than any other middle school. springville elementary school brings diverse group interms of ethnicity and economic background. ~~Inorder~~ In order to ease the overcrowding in middle school such as stroller, I would recommend moving findley elementary school to newly constructed Timberland middle school as it is closer, and meet BSD criteria. It ~~created~~ does not make any sense to move springville to any other middle school as it includes moving many other elementary school.

School(s) attendance area(s): Rock creek, stoller, westview.

Question /Comment:

1 For Diversity purposes ~~and~~ rock creek should be in Stoller MS boundaries

- Rock creek is first school feeding to stoller
- Here is proposal to reduce stoller to 90/.

Stoller → Rockcreek, springville, Sato, jacob wismer

2. Based on students feeding to stoller MS

Rock creek → smallest population (97 - 5th graders)
516 - total)

~~Springville~~ Sato - 98 (5th graders)
649 (total)

Springville 121 - 5th graders
724 - total

3. Findley is better suited to go to timberline based on population and student feeder. That will leave more growth future for ~~set~~ north bethany.

School(s) attendance area(s): Springville K-8, Stoller MS

Question /Comment:

As parents we want our kids attending neighborhood middle school which is Stoller. Having our kids attending neighborhood middle school will make our life much easier! Not to mention as Springville opt out K-8 option, we have less choice choosing neighborhood middle school.

Minimum change is important for this middle school boundary adjustment. The number of Springville students is over 800, and the number is still growing.

Please put our thoughts into consideration and help Springville students stay stable with Stoller — their neighborhood middle school!

Thank you for your consideration!

School(s) attendance area(s): Beaverton Springville K-8, Stoller MS

Question /Comment:

Thank you for taking the time to read my comment. I think Springville should go to Stoller because it is closest to where we live. For the reason of safety and effidency this is the best option. It is not reasonable for the students to go to another school which will be twice of the distance at least. From my home to five oaks, it takes 18 min, roughly 4.8 miles, even longer than to go to Westview, the high school; While to Stoller, it only takes 9 minutes with 2.5 miles. I have been living in California; and I have never heard of any place who would do the school boundary without considering the safety/distance as the first priority. The more the kids take time to commute, the more risky factors there involve!! As a parent, I will be super disappointing if that happens and I will keep fighting for it because safety of my kids is number 1 issue.

Portland (City) OR (State) 97229 (Zip)

Phone: 801-884-9998

School(s) attendance area(s): Springville ES / Stoller MS

Question /Comment: Theme 1 makes the most sense to minimize travel time of all districts / boundaries. Travel time without traffic from my current residence to Five Oaks would be 24mins and with morning traffic it would be 30 equalling a round trip of one hour each day

Trying to keep most schools from crossing hwy 26 freeway would be ideal, unless less than 10-12 minutes of travel time could be accommodated.

Question /Comment:

As a Parent of 6th Grade kid who is studying in Stoller middle school, I would suggest to keep the school Boundaries as is. if the boundaries are changed, the students will move to different schools which will impact the future career of the students. As a North Bethany Residents, our preference for the middle school should be with in minimum commute time. So that students can spend more time on their studies. if students have to travel more time, they will loose the time for other activities like. swimming, dancing, playing & etc; which are very important in their lifes at this age.

Hence I disagree to change the boundaries.

Question /Comment:

As a parent of 1st grade going kid in springville, I would ~~more~~ wish that the current set up of ES/MS/HS stays intact. Just recently we were informed that Sprinville will not be having MS any more & would be a K-5 school.

Now with other MS (stretch) also planned to be changed, it would be double impact and might affect kids who are expecting to go to stretch would be shocked.

I would request the BSD committee to consider the least impact ways for kids and keep the existing ES/MS/HS setup intact for the betterment & future of our kids.

Question /Comment: Middle school boundary should be based on proximity to elementary school feeding into it, taking into consideration walking / biking distance for convenience of the kids.

Current overcrowding at Stoller MS is due to huge growth of housing in North Bethany Area (Springville ES and Sato ES). These communities will continue growing in foreseeable future. As such North Bethany should have its own Middle school

Stoller MS should continue having Jacob Wismer and Findley Elementary as feeder schools given closest proximity. Sato ES being next closest elementary should also feed into Stoller.

School(s) attendance area(s): FINDLEY STOLLER SUNSET

Question /Comment:

Findley families have built Stoller in the last several years by the wonderful kids, large number of initiatives, thousands of hours of volunteering, establishing, proven support by family employers ~~lite~~ in matching donations, established eco-system of family and friends, siblings and various initiatives. There is no reason to disrupt an existing working eco-system. The new homes and newer communities should consider building the same level of effort like Findley parents have done in the last two decades by attending the new middle school. Finally all Findley students are within 1.5 miles of Stoller. Findley also brings a very diverse composition.

School(s) attendance area(s): Stoller (6th), Springville (2nd)

Question /Comment:

I have heard a lot of themes around boundaries. There were a very few objective ones. Considering proximity is most logical path. Rather than have an entire community take the change, its always better to share the at. Creating Micro boundaries, using data for distance, diversity and economic ratio would be best served for the community.

[Request to consider to bring back 6, 7, 8th to Springville and also SEMMA program.]

School(s) attendance area(s): Springville "K-5", Stoller MS, Westview HS.

Question /Comment:

We already heard of a decision earlier this year that MS (6th, 7th, 8th) is being phased out of Springville, and being fed into Stoller MS. This is the first increase in distance.

Moving Springville to any other MS will increase the distance further

A Double-whammy for Springville kids is not the right policy ...

To preserve the Geographical Balance, we must have Springville feed into Stoller MS.

If this Cannot be done, Bring back MS to Springville and make it a better MS education.

THANK YOU!

School(s) attendance area(s): Springville, Stoller, Westview

Question /Comment:

As a parent of a Springville student with strong ties to the community, in my opinion it is important to leave Springville in the stoller middle school boundary. Earlier this year, the district notified us that grades 6-8 will be phased out of Springville over the next 2-3 years. This leaves stoller as the only viable option for our family and changing the boundaries to remove springville from stoller will destroy community bonds that have been forged and make it nearly impossible for families in North Bethany to participate in meaningful extra-curricular activities because of commute times alone.

Hwy 26 is a natural boundary and I would implore the board to not consider moving those currently in Springville south of 26. Doing so takes away the children's ability to commute on their own to school via bike, walk, scooter, etc., increases traffic and safety concerns as Bethany Blvd ~~is busy~~ and 185th are highly traversed roadways during peak times and will increase BSD costs as many more children will now need to be bussed and will potentially increase the need for more routes.

Based on the foregoing, Springville should stay in stoller middle school's boundary.

School(s) attendance area(s): Rock Creek, Stoller, Westview

Question /Comment: I feel that 97229 should not move to Five Oaks, my kids will not be able to walk to school at all due to crossing 26. It takes 30-40 min to drive to five Oaks from my house as there are only two roads to cross 26 to get to school. There will be no biking or walking for any of our kids causing more bus driving and huge headaches with any inclement weather as the kids would not be able to walk home at all. I will lose value in my home if you move our middle school. 26 is terrible Please look at demographics of driving/walking not just distance. Major cross Hwys should never be crossed with middle schoolers.

Thank you Sincerely

Tonia

School(s) attendance area(s): Springville, Stoller & Westview

Question /Comment: I propose Springville to stay with Stoller middle school for the following reasons:

1. Stoller is closer to Spiriville as compared to 5 Oaks middle school. So less travelling time for kids. More travel time means, they'll get tired & less focus on ~~ed~~ their homework & extra cirricular activities specially if they are SUMMA kids. Longer the distance that sometimes getting stuck in traffic, bad weather, & so they'll get tired & no focus on academics. #
2. ~~Also~~ More expenses for district — More distance means district needs more money for ~~b~~ gas for buses & more buses & driver pay. ~~Also~~ Already there's low budget in the district.

So I highly advocate for Springville, Sato, Jacob Wisler & Rockcreek to stay with Stoller.

Question /Comment:

(i) In case of EMERGENCY, the kid has to Cross 26W Freeway, which is a big risk as the Springville is close to Stoler Middle School.
e.g. In Case of earthquake, Natural disaster etc.
The Findley is close to new Timberland Middle School so lets the Findley close to go Timberland & Springville to Stoller.

ii) By adjusting 520 to new Timberland MS the kids from Springville can go to Stoler MS. Instead of pushing them to Fiveoak MS.

Question /Comment: My ~~son~~ goes to Springville and ~~he~~ would go into Stoller MS which is the most logical option given the distance from where we live. Five Oaks is 4.5 miles away across US 26 and commute times will be more than 30 mins which means kids have to wake up earlier than they do now. and spend more time commuting. which will tire them out. Also my elder son went to Stoller MS while we lived in the same boundary. It doesnot make sense to move Springville into Five Oaks.

Question /Comment:

We live 2.7 miles away from Stoller and driving my daughter to school only takes 8-10 mins. She has activities she attends to after school in Bethany Area and moving her to Five Oaks is going to affect her tremendously. Her time now is only enough to do home work and activities. Five Oaks is over ~~[illegible]~~ 5 miles away and factoring the traffic jam/rush hours, there's no way she would be able to do any outside school activity. Please keep Springville Students in Stoller.

Question /Comment:

We live <1 mile from Stoller. Our kids can walk to Stoller. And take advantage of the Stoller SUMMA program. We bought a house <1 mile from Stoller 15 years ago. Forcing Findley to move out of Stoller is NOT the right solution to fix a North Bethany growth issue.

A longer term solution is to build a Middle school for that growing area. And in the interim live with the overcrowding and keeping K-8 options in SPV until the new middle school is ready

Question /Comment: I propose stoller middle school for springville five oaks school will be tofar for us. 🙁 five oaks to springville to reach in the evening it take atleast 45 mintues, end of the day kids need sit in the bus for hour to reach home. In the winter weather gets bad so what is the solution for kids.

Question /Comment: Thankyou for the opportunity for listening to my comments.
My both daughters studied in springville school. My eldest is already in Stoller. My younger will start middle in 2020.
My eldest enjoyed her current school and we are accustomed to the school teachers and schedules.
My concern we have only one school closer to our house which is Stoller. The ~~close~~ Springville school is phasing out and we are left in minimal options other schools are far and would need to cross freeway plus 185th is very crowded for middle school children to reach online for bus especially in morning rush hours. I see in the maps other schools have multiple middle school closer to.

School(s) attendance area(s): stoller

Question /Comment:

(1) It does not make sense to split the school boarding inside one neighborhood. ~~At least~~ For Theme1 which split the Findley school even inside one neighborhood is ridiculus! Theme1 also cannot satisfy the student number adjustment goal for stoller. For Theme2 and 3, it makes better in stoller number reduction. Theme2 is the best among 3 for achieving district's goal 102.

(2) school district need to consider moving new suma students into new school from stoller. (existing suma won't change until graduate) But for new suma students which probably around 400 students will be a big reduction for crowded stoller.

School(s) attendance area(s): Springville, Stoller, Westview

Question /Comment: We live 1.5 blocks away from Springville, and want to keep our kids going to Stoller. We enjoy the sense of community in our area, and do not want to commute all the way to Five Oaks or Meadow Park, when Stoller is only about a mile and a half from us. Overall, I support MS Boundary Idea Map #1, with some changes proposed by fellow Springville parents.

Question /Comment:

~~1~~ Make changes based on commute, capacity of MS, economical diversity, community and diversity.

Springville ES should feed to Stoller based on ① how far kid need to travel (it is the closest) ② only Stoller can handle Springville ES in terms of # of stude

③ ~~Sheridan~~ Springville ES has economically diversified community

④ ~~Sheridan~~ Springville ES contains diverse community.

School(s) attendance area(s): ~~SPRI~~ SPRINGVILLE K-8

Question /Comment: I have 2 Son who goes to SPRINGVILLE K8 - One is in kinter garten and elder Son in 4th grade. I would like them to go to Stoller for their middle School This gives them more family time, less Commute to/from their School. Longer Commute time also Puts kids in unnecessary danger due to traffic/weather ~~Conditions~~ Conditions. A Close to 4-5 miles of Commute time Suggested on Home 2 or 3 makes no Sense for SPRINGVILLE School kids. This is NOT fair to the kids & the Parents. Please make a wise decision!

This is our kids ~~fut~~ future & being fair is the top most thing we should teach to our kids & Let us be the example for it

Portland (City) OR (State) 97229. (Zip)

Phone: 503-292-1188

School(s) attendance area(s): Findley – Jacobwismes – SATO – STOLLER.

Question /Comment:

please don't change the plan for Stoller. Keep findley and Jacob wismes to stoller. Build a new Hs to Springville. That community is growing more in the future and moving them won't help.

Highlights :-

* Keep findley + Jacob Wismes + Sato → Stoller.
* Build a new Highschool for Springville and Sato as they are expected to grow in the very near future.
* Add a new Suma program to the new high school if needed.
* All of findley is less than 1.3 miles to Stoller.
* Breaking a part of Findley to Stoller is not advicable from a Students standpoint.

School(s) attendance area(s): Springville-Stoller-Westview

Question /Comment: We absolutely cannot change schools from Stoller to Five Oaks or Highland Park. The distance alone is challenging. Consider traffic on the only two main arteries, Bethany Blvd and 185th, with minor arteries connecting. We moved to our neighborhood specifically for the school rating. Why wasn't this considered when approval was granted to build the number of homes in our area? We have six elementary schools feeding into one middle school. Clearly this is misaligned. I only approve Boundary Map Theme 1. We cannot live in North Bethany and attend middle school in central Beaverton!

School(s) attendance area(s): Springville going to Stoller

Question /Comment:

1. while springville is the farthest from middleschool in Timberland. So if ~~Stoller~~ springville needs to go to any other middle school other than stoller, ~~it has first~~ it has to cross atleast 1 ~~e~~elementary school to go to timber land or meadow park middle school.
2. findley school should be split into 2 parts. Areas closer to timberland can go to it & areas near to stoller can come to stoller.
3. To decongest stoller, ~~as~~ full springville school needs to feed to shilan & remaining stoller capacity can be fed from other ~~e~~elementary schools such as Jacob Wismer & Findley Community that is closest to stoller. Remaing part of findley elementary needs to go to Timberland school.

Public comment can also be given online at: https://www.beaverton.k12.or.us/ms-boundary-comments
