Equity*

Racism is a fierce, ever-present, challenging force, one which has structured the thinking, behavior, and actions of individuals and institutions since the beginning of U.S. history (The Racial Equity Institute, LLC, 2018).

To begin the process of understanding and dismantling racism, we will bring together diverse people from our communities to explore our own racial identities, and understand how the social construction of race and the history of oppression has contributed to current societal issues that impact our schools, work and neighborhoods. Through structured dialogues and protocols, participants will experience personal growth and development as well as tools to deconstruct racism within our communities.
