

Articulating the Challenge: Using Metacognitive Questions

Metacognitive questions help students

- plan more effectively
- understand their own strengths and weakness
- reflect and improve learning

Metacognitive questions are best modeled by the teacher and displayed in class. Examples include:

- What should I do first?
- Is anything confusing to me?
- Can I explain what I've learned?
- Should I ask for extra help?
- Why did I get this answer wrong?
- Can I apply this in different contexts?
- How can I do better next time?
