

## Millfield Activities Programme (MAP)

MAP is an integral part of a Millfield education and encourages pupils to gain experience and develop skills from a diverse range of activities outside their standard curriculum.

We offer more than 100 activities, that range from the practical to the creative, adventurous to reflective, and the mentally to physically challenging, as seen in the selection below.

| Example Activity          | Available to  | Example Activity              | Available to  |
