

# MULTIMEDIA WEB DESIGN

ASSOCIATE OF APPLIED SCIENCE

*Student work using Adobe Illustrator*

*Student work using Adobe Photoshop*

The Associate of Applied Science Degree in Multimedia Web Design program is a collaborative effort from Sachse High School and Richland College. The degree is designed to enable students to participate as creative and resourceful members of a web development team. Upon successful completion of this program, the student will be experienced in cross-platform development and editing of graphics, audio files, and animations for use on the Internet.

Students participating in the program will take dual credit coursework at Sachse High School and have the opportunity to take classes on the Richland College campus their senior year.

*Students must apply and be accepted into the program. Space is limited so talk to your counselor today.*

*Student work in Adobe Illustrator and Adobe Photoshop*

# Multimedia Web Design AAS

## What classes would I take?

Students in the program take classes such as Digital Media, Web Design, Animation and Digital Imaging in addition to the required core content. The focus of the program is on developing marketable skills in the creation, manipulation and publication of digital work.

The program utilizes industry standard software such as Adobe Photoshop, Adobe Illustrator, Adobe InDesign and more.

## What will I learn?

You will learn to create and edit digital images, video, audio and animation. You'll know how to create and publish content for the Internet including web sites and blogs. Through the program you will gain knowledge in the theory and practice of digital design as well as digital marketing. You can also use the skills developed to earn industry certifications from Adobe that will make you more marketable to employers.

## What can an AAS in Multimedia Web Design do for me?

- Better prepare you to enter the workforce when you graduate from high school.
- Help you earn a starting salary that ranges from 35,000 - 60,000 a year.
- Provide you with the means to develop a professional portfolio.
- You will graduate with an Associate of Applied Science degree when you graduate from high school.
- It could shorten the time you would need to spend if you choose to earn a Bachelor degree.
- The industry is projected to increase more than 35% over the next decade.
