CHOICES 2019 READING LISTS

Children's Choices
Teachers' Choices
Young Adults' Choices

From the Executive Director

When it comes to engaging students with reading, we know the importance of choice. We know that when students have access to and can select the books they want to read, with stories and topics that speak to their interests, and with characters who look like them and with whom they can relate, they are more likely not only to read them, but also to understand and to reflect upon them.

With that in mind, we are delighted to bring to you the 2019 Choices Reading Lists—Children’s Choices, Teachers’ Choices, and Young Adults’ Choices. These trusted and anticipated lists offer a wealth of options for back-to-school and after-school reading, for building your classroom or school library, or for adding quality titles to your curriculum.

The best part is the books on these annual lists are chosen by students and educators themselves, so you know they will please everyone from our youngest readers to our most selective teenagers.

We know this because choice matters—and it can make all the difference.

2019 Reading List

What Is the Young Adults' Choices Reading List?

The Young Adults' Choices project began in 1986, funded by a special grant given to the International Literacy Association, and was supervised by the Association's Literature for Young Adults Committee. The goals of the project are to encourage young people to read; to make teens, educators, librarians and media specialists, and families and caregivers aware of new literature for young adults; and to provide middle and secondary school students with an opportunity to voice their opinions about books being written for them and in whose pages they can find characters and experiences to which they can relate. The books included on this enclosed list reflect current trends in young adult literature and titles that will engage today's readers.
