FOR IMMEDIATE RELEASE

Construction crews were busy over the summer at Northshore School District's Elementary #21 and Skyview/Canyon Creek Expansion Project

Bothell, Wash. – Elementary #21 made notable progress in August, including full enclosure of the building with the installation of all windows and exterior doors.

Interior work continues, including painting in some areas of the building such as the gym and stage. Planning Principal Cathi Davis has been busy working with vendors to select student desks, chairs, office equipment and more.

As for exterior site work, horizontal drilling will conclude soon and then the team will flush, test and sample the water. The team is also hard at work on the Large On-Site Sewage (LOSS) system with installing mechanical and electrical rough ins.

In early September roundabout work will commence, with phased road closures as needed for the project. Nearby residents will be notified about any necessary closures.

The District continues to seek input from students, staff, families and community members for the District's newest elementary school. Name ideas can be [submitted](#) through Sept. 27, 2019. A committee will then narrow the selection, ask for additional community input, further narrow choices and then submit a few ideas for board approval.

The Skyview & Canyon Creek expansion project also continued to see a lot of progress during the month of August.

Crews installed all of the new equipment in the rebuilt state-of-the-art kitchen at Skyview. Also, the addition for the two new health classrooms at Skyview was fully enclosed.

A new space for the kiln was built at Canyon Creek. Also, a temporary wall was constructed, which will make it seamless for construction crews to continue the work on the additional gym space.

The majority of the parking and paving work is complete at both sites and landscaping will be coming soon.

When students return to campus, much of the focus for the construction team will return to the main two-floor addition, where they will work to finish flooring, electrical, lighting and painting.

Continue to follow the progress by [visiting our construction page](#).
