

2230 CURRICULUM GUIDES

The Board of Education requires that curriculum guides be provided for each course taught in the schools of the Edison Township district. Such guides shall include a statement of purpose; specific objectives of the course; an outline of the concepts/skills and/or attitudes to be taught; instructional strategies/activities that increase the probability of the desired learning, basic textbooks, and supplementary materials designed to achieve the desired learning; and methods of assessing intended learning. Curriculum guides may be prepared by the staff or purchased as part of a commercially published program.

All teachers are required to maintain and use an updated curriculum guide and Board-approved materials on which to base instruction. It is expected that all teaching will be within the framework of the approved guides and materials; e.g., philosophy, objectives, concepts and skills, etc. It shall be the responsibility of building administration/supervisory personnel to ensure that the curriculum guides are being followed and Board-approved materials are being used.

A copy of each guide in use shall be kept on file in a central location in each building. Such guides shall be available for public inspection.

New curriculum guides or revisions to existing guides shall be approved by the Board before implementation.

N.J.S.A. 18A:33-1

Adopted: 24 January 2011
