1. Julie Haefner presented a new course proposal for our high school.
 - a. Farm to Fork would be an introductory course where students will have the opportunity to explore where the food they eat comes from and the role of the environment in food production and trends. The course would also incorporate the concept of sustainability.
 - b. Farm to Fork would be offered as a semester long course as part of our Family and Consumer Science program.

2. Discussion of Course Proposal documentation.
 - a. We discussed possible additions/changes to our course proposal form. This would include adding a component that would describe the “why” the course would be helpful to have in our Program of Studies. It would also include the “how” it would fit into the bigger picture of what we are trying to accomplish in terms of course offerings for our students.
