

# Tdap and Meningococcal are REQUIRED BY LAW!

New Jersey State Law (N.J.A.C. 8:57-4.19) requires ALL students who are entering 6<sup>th</sup> (sixth) grade AND are 11 (eleven) years old must receive one Tdap booster and Meningococcal (MCV4) booster.

All children born after January 1, 1997 attending or transferring into a NJ school at grade six or higher grade level (including from another state or country) are subject to the Tdap and meningococcal vaccine requirement

If your child does not meet New Jersey State Law requirements by the start of the school year, your child will be excluded from school until they receive the required vaccines.
