Statement of Purpose

The Edison Public School District is committed to improving instruction and providing the most challenging academic opportunities for our students. The district has recently restructured the Business Department curriculum in order to provide students with expanded opportunities in college and career after high school, and the Economics program has been significantly revised. Supported with new textbooks and on-line resources, the curriculum will be current, rigorous, and aligned with New Jersey standards to provide a solid foundation in marketing and advertising concepts.

Marketing and Advertising provides foundational knowledge and skills leading to a post-secondary or career pathway reflecting individual talents, abilities, and interests. This course enhances communication skills, social and emotional intelligence, and information management. The course provides students with a learning environment in which core business administration skills tie with marketing-specific skills and content. Marketing provides an integrated academic and career program of instruction that enables students to successfully prepare for 21st Century challenges in a global economy. Advertising is designed to focus on the competencies needed for the planning and implementation of a successful advertising program. Students are exposed to media methods of research, budgets, and evaluations that are used to sell a product, service, or business. Hands-on experience is given in copy writing, layout, and production in various media.

Marketing and Advertising is a full year, Level 1 course designed to provide the student with a background in the functions and principles of marketing and advertising. Marketing & Advertising meets the New Jersey mandate of a 21st Century Career requirement for all high school students. This class enables students to apply skills to a variety of activities centered on the 7 Functions of Marketing: management, finance, personal selling, promotion, distribution, pricing, and product. Students will develop assignments and projects that authentically assess learned skills, some of which are: creating a sales presentation, shooting a television commercial, writing a business plan, and developing various advertising print media. Students utilize productivity software such as Microsoft Office Suite, as well as engage in research and participation through the internet, throughout the course.

Marketing & Advertising encompasses topics such as: the U.S. economy and its role in global marketing, e-commerce, consumerism, product development, pricing, business competition, advertising, public relations, promotion and careers. Students acquire a strong foundation on how businesses use effective marketing strategies in the business world.

The curriculum guide was revised by:

Lydia Bachorik – Edison High School

Dina Tolba – JP Stevens High School

Completed under the supervision of Mr. Joseph Ferrara, EHS Assistant Principal, and Dr. Anthony Shallop, JPS Assistant Principal.

Unit 6: Distribution

Targeted State Standards: 9-12.9.1.12.2, 9-12.9.1.12.1, 9-12.9.2.12.A.5, 9-12.9.1.12.1, 9-12.9.1.12.D.3, 9-12.9.1.12.B.1, LA.9-12.3.3.12D

Unit Objectives/Enduring Understandings: Distribution channels are necessary in every marketing decision. The purpose of this unit is for the students to understand the channels of distribution and to be able to select the appropriate channel in order to sell consumer and industrial products effectively.

Essential Questions:

- How are the channels of distribution as vital to marketing as the arteries are to the heart?
- Why the channels of distribution as vital to marketing as the arteries are to the heart?
- Why would a manufacturer bypass a retailer and what would be the effect?
- What is a Channel of Distribution?
- How do the channels of distribution differ between consumers and business-to-business products?
- How are transportation systems used to move products?
- What are the different kinds of transportation services?
- How does planning purchases differ between an industrial market and a resellers market?
- What is the concept of chain store buying? How is merchandise received and checked?
- What procedures are used for transferring merchandise?

Unit Assessment: Students will understand the dependency relationship that exists among channel members by charting the flow of goods from manufacturer to consumer.

Unit 7: Pricing

Targeted State Standards: 9-12.9.1.12.2, 9-12.9.2.12E.8, 9-12.9.1.12.1, 9-12.9.2.12 A 1, 9-12.9.2.12 E4, 9-12.9.2.12 E 6

Unit Objectives/Enduring Understandings: Consumers decide the fate of all products and services that are marketed. The purpose of this unit is for the students to explore the importance of price and all of the factors that affect the pricing decision. Students will learn the relationship between pricing and a company’s profitability based on pricing calculations

Essential Questions:

- What causes a product or service to become obsolete?
- What are the different forms of price?
- What are the goals of pricing?
- What is the difference between market share and market position?
- What are the three basic pricing concepts?
- What are forward pricing and backward pricing?
- What are the two polar pricing policies for introducing a new product?
- How is a firm’s net profit or loss related to pricing?
- How would I calculate dollar and percentage markup based on cost or retail?
- How would I determine a sales price?

Unit Assessment: Students will acquire evaluative skills that will enable them to make intelligent decisions about the products and services that are marketed by businesses.
