

Glenview School District 34
1401 Greenwood Road
Glenview, Illinois, 60026-1511
www.glenview34.org

Dear Families of District 34,

We understand the interest many of you have in reviewing the results to the precautionary water testing, which we referenced in a communication that went out this afternoon. Given the complexity of the information contained in these reports, we are currently working on developing a summary to accompany the results to better support families in their understanding. This summary and the full results will be [available on Monday and posted here](#).

We also wanted to share with you that we have shared all of our test results with Dr. Jerrold Leikin, a leading medical toxicologist based at NorthShore University HealthSystem. It is through Dr. Leikin's confirmation that we were able to earlier share with confidence that it is very unlikely that our students or staff would have any adverse health effects solely attributable to water quality at Glenview District 34 Schools.

We will continue to update our [district website](#) with additional information as it becomes available. Many resources have already been posted, including the [FAQ](#) that was shared earlier today.

Please look for an e-mail with access to these results on Monday.

Sincerely,
Superintendent Mike Nicholson
