|                                                                                                                     | o 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

THE BRIARWOOD **SCHOOL** 

# ummer Remediation Program

Teaching Academic Skills

**Developing Learning Strategies** 

**JUNE 4 - 25** Grades K - 6 | 8:30 - Noon

# Who We Serve

STUDENTS WHO BENEFIT FROM THIS PROGRAM MAY DISPLAY DIFFICULTY WITH THE FOLLOWING:

- Associating sounds in words when reading or spelling
- Blending or segmenting sounds when reading or spelling
- Understanding / retelling a story
- Forming complete oral or written sentences
- Sequencing / organizing information orally or in writing

Space is limited

The Briarwood Difference!

- Specialized staff of certified Speech-Language Pathologists and reading specialists
- Evidence-based academic strategies that can transfer to multiple settings
- Individualized therapeutic treatment
- Reported outcomes

Students attend four 45-minute sessions daily during the program. Emphasis is placed upon the building blocks of language-based literacy: listening, speaking, reading, and writing.

### **SPEECH THERAPY**

Students meet individually with a speech-language pathologist to improve skills in phonological awareness and descriptive language. Session objectives include increased vocabulary and more flexible understanding and use of language.

### WRITTEN EXPRESSION

Students work within a small group to learn the essential framework of a sentence. Practice is provided in expanding sentences and varying word placement. Both grammar and features of editing will be reinforced during the writing process.

### **STORY COMPREHENSION & RETELLING**

Students learn to identify and sequence story elements to recall and build oral or written narratives during this group session. Students associate and connect ideas to improve their overall listening and comprehension skills.

### **READING FUNDAMENTALS & FLUENCY**

Phonological awareness, decoding, and reading fluency are addressed during this group session. Using multisensory techniques, students strengthen sound-symbol association or learn strategies for decoding using syllable types. Activities requiring sound manipulation and discrimination or morphemic decoding are also utilized in building and strengthening foundational reading skills.
