

# Communication to Parent Emergency Preparedness Plan

The Dayton Early College Academy will work to get accurate and immediate information out to families and communities in the event of an emergency at a district facility that requires parents or families to take immediate action. The district will use the following ways to communicate:

## **One-Call**

This system has an option to immediately notify families via text messaging. Employing One Call, our current practice is the voice message call sent to home/cell notifying parents of an emergency at their student's school. Please make sure your student's records are up to date to ensure timely notification.

## **District/School Website**

The District will use the "District and school website" to communicate information to families, staff and the community before, during and after an emergency. The address for our District website is [www.daytonearlycollege.org](http://www.daytonearlycollege.org)

## **Social Media**

The District will use social media to communicate during an emergency. Please make sure that you like and follow us on our facebook page "Dayton Early College Academy" and follow us on twitter at "@DECA\_HS."

## **News Media**

The District will work with our news media partners to provide our school communities with timely information during an emergency.

**\*\*\*\*\*In the event of a city-wide communication failure rendering the District unable to communicate, the expectation is that families will have a plan in place to pick up their student(s) from school. The District recommends that you get to know neighbors near your child's school and develop a pick-up plan in the event of a major disaster. Please make sure all persons authorized to pick up students are on the emergency contact information at school. \*\*\*\*\***
