

Hello MDE Students and Families,

This year for Science Night we are having a duct tape challenge! Are you interested in participating? All you need to do is make something out of duct tape, put your name on it and bring it to MDE's cafeteria on February 20 to display on the stage. Memorial Drive Elementary will be hosting a Science night from 5:00-6:30. There will be prizes! It is an opportunity for kids to be creative and build whatever they can dream up out of duct tape and imagination! Everyone that comes will be able to see your fantastic project. Work on your creation at home and have it ready for display for Science Night. If you have any questions you can email me at amy.kirn@springbranchisd.com.
