Good morning Mrs. Parrott!
Hi Mr. Stevens!

Hello Vikings!

Hello Vikings!
It’s time to register for next year. There are two steps to this process: step 1, fill out your paper registration form. Step 2, register online.

These are some of the things you need to be familiar with when choosing classes for next year.

*Be prepared to:*
- *Spend some time exploring independently*
- *Use the resources available!*

7 Period Day
7:30 to 2:35
Your graduation requirements
Your grad status
Your transcript
The online registration process
-and-
Your registration packet
Buckle up Vikings, course registration is gonna be lit! Let’s go!

A quick reminder about credits: all students are required to earn 24 credits to graduate. Each yearlong course earns you 1 full credit and semester classes earns .5 credit a piece.
In front of you, you should each have a registration packet noting High School Graduation Requirements. On the back of this form is a “Graduation Requirements” worksheet that will help you to organize your four year plan. We hope you use this form as a reference when making your decisions on classes.
The credit requirements may look a little confusing at first, but we are here to help break it down! This chart shows you exactly how many credits you need to graduate from Inglemoor and gives you a comparison of what colleges require as well. You will notice that most of our requirements are the same!

Next to World Language and Art, notice the letters PPR, that is short for Personalized Pathway Requirement. You can choose to take both of the credits in World Language and Art, or you can choose classes that best fit your personal goals and interests by following a PPR.
We also like to include a side note about the senior year math based quantitative course. Most colleges like to see students continue with some sort of math content into their senior year, either through an additional math class or a science class that has math content. Math is a skill that is best learned with continued practice!

In addition to your credit requirements, you must also pass your state exams and you must successfully complete any combination of two AP, IB, Running Start, Tech Prep, or College in High School classes.
As an example, Inglemoor offers the following Tech Prep courses.

Your diploma summary and transcript will be available for pickup next week after grades are posted. This is a complete picture of the credits you need, the classes you have taken or are currently enrolled in, and what you still need to complete. Pay attention to anything that is highlighted in grey, as those are the classes you will be looking to fill as you register! In the meantime, go to
Course History in Student VUE to see what Graduation Requirements are remaining for you.

As an example, this 11th grade student still needs to complete 1 English 12 credit, 1 Senior History credit, .5 CTE, and 3 flexible credits.
Your transcript is an important record of your high school career and it will be necessary for college applications and even some job opportunities. Your transcript is your official record of all high school courses you have taken, the grades you earned, and your cumulative GPA, found at the bottom right corner of your transcript.

Keep these things in mind when selecting your classes:

- Find a balance
- What do you enjoy doing the most?
- Try challenging courses
- Ask your teachers or counselor for advice
* Always strive for a balance in work and life! Work hard, but make time for rest and time to do the things you love the most.
* Think about what interests and inspires you
* Take appropriately challenging courses. It’s good to get out of your comfort zone, just don’t overdo it!
* Keep in mind your plans for after high school

Now let’s look at the course options sheets. You will use this form to select your classes for the entire year. All Inglemoor courses available for your grade level are listed on this form.
First things first vikings, for the Inglemoor class schedule for next school year we are asking all students to register for 7 periods. We are using the sophomore sheet as an example in this video.

Pay attention to the course ID numbers, you will need those when you go to register online. Make sure to write in your alternate choices in case your first choice elective isn’t an option.
* Be sure to check in with your teachers for placement recommendations. They will be the best person to guide you in their subject area!
* If you are considering the IB Diploma in your junior and senior year, it is highly recommended that you take Pre-IB classes and begin your world language requirements ASAP!
If you are currently a rising senior IB Diploma student, you will need to select IB TOK as one of your 7 classes.

If you are considering taking an AP or IB class, but you aren’t sure of the difference, here is a simple answer: IB courses typically last two years, while AP courses last one year. College credit may be offered for both if you take and pass the appropriate exams.
IB and AP courses are perceived as equally challenging options. Here at Inglemoor, we offer a rigorous comprehensive IB Diploma Program. Explore your options for both AP and IB through the course description book.

* AP and IB classes are self-select, meaning you can take one or more of both! You do not need to be an IB Diploma student to take IB classes. And if scheduling allows, IB Diploma students can take AP courses.
* Again, keep in mind appropriate level of challenge and ask your teachers!
Up next, a quick overview of the online process. And yes, you need to complete both paper and online registration!

Follow along with me, to register online you simply log in to your StudentVue account. If you aren’t familiar with StudentVue, you can find a link on our homepage and your login is your student ID, password is your 8 digit birthdate.
Once you are logged in to studentvue, you click the Course Request tab on the left side of your screen.

Notice the button at the top left of the screen titled “click here to add course requests.” This will bring up the search bar.
Let’s start by entering the course ID. As an example, this student is wanting to register for ASL 100; they will need to type in the course ID “WLX100” which is found on the course option sheet.

You should now see the courses you selected at the bottom of the screen. Be sure to change courses to “request” instead of “none” or “alternate.” Finally, click here to move selected courses to course requests.
That's it! Your added class requests are automatically saved!

You have access to course requests online until Feb 14th @ midnight!

A brief note about WaNIC/Satellite classes. These are advanced technical career programs that are hands on and offer job opportunities in high demand fields. Most of these programs are off campus and cover 2-3 periods of your day. Based on your grade level, some of these programs may be available to you next year.
See our wonderful Occupational Information Specialist, Mrs. Buckner in the College and Career Center if you have questions about the application process. She is happy to help.

If you are interested in applying for one of these programs, please select and mark the corresponding box on the WaNIC programs sheet in your packet.
In addition to selecting WANIC/Satellite on your course option sheet you will also need to complete an application that you will find attached to your registration packet.

Many students need to see these programs to believe them! NSD will offer an open house to highlight these programs and provide more information. If you are interested in any of these programs please attend!
If you think you are interested in Running Start classes as a junior or senior, here is what you need to know:

- You can attend a local community college and take college level classes to earn your high school credits.

Please be thoughtful about choosing Running Start as an option. Successful students that pursue running start are independent starters, enjoy and search out challenging courses, and are motivated academically.
If you are interested in Running Start please attend the Information session offered through IHS as well as an information session offered through the CC of your choice.

If this appeals to you, please check the appropriate box for either full time or part time Running Start. Then, please visit the counseling webpage online to download the forms and attend an upcoming information session.
Here are some other resources to help you choose your classes:

- Ask your teacher
- Visit the counseling website for links to all this information under Course Registration, and
- Meet with your counselor; counselors will be visiting English/History classes to meet 1:1 with each and every Inglemoor student.
One additional resource we would like to highlight is our course description book! This includes a detailed description of every course offered at Inglemoor so you can decide if the class is right for you.

If you want to know more about our programs, pull up to the following information sessions: WaNIC/Satellite, Running Start, Electives Fair, IB Information Night. Stay tuned for dates and times at the end of this video.
Don't forget! You need to complete BOTH your online registration and paper selection sheet; you'll return your paper copy to your 2nd period teacher.

Signed, Your Inglemoor Counseling Department

(No audio)
Information Sessions

IB Info Night (Current 10th Graders) - Monday 2/3
(7pm in the Little Theater)

WANIC/Satellite - Wednesday 2/5
(during both lunches in the Little Theater)

Running Start - Thursday 2/6
(during both lunches in the Little Theater)

Electives Fair - Wednesday 2/12
(during both lunches, cafeteria)
