McLAIN HIGH SCHOOL FOR SCIENCE AND TECHNOLOGY

At McLain High School for Science and Technology, our scholars thrive in a student-centered learning environment where teachers focus on creating strong relationships with students and supporting them to be successful academically, personally, and socially. Our students benefit from individualized learning pathways with our Reading Plus and Teach to One Math programs and can participate in a range of elective courses including choir, band, Spanish, art, and a variety of technology courses.

**McLain High School for Science and Technology Students Can:**

- Build meaningful relationships with caring teachers who are committed to helping them be successful;
- Engage in personalized learning pathways with Teach to One Math and Reading Plus; and
- Explore potential career pathways and begin planning for their post-secondary future.

TEACH TO ONE MATH

Our Teach to One Math program is an innovative, instructional model that provides an individualized math curriculum for each student. By personalizing the experience, students are able to have more ownership, which empowers them throughout the learning process. Our students are accelerating their learning with a combination of approaches aligned to how they learn best.
