

AIM Institute[®] for Learning & Research

AIM Pathways Technical Requirements

Participants

Personal devices must be able to run one of the major modern browser versions. Generally, this breaks down to this list of devices.

- Mac running MacOS 10.13 (High Sierra) or newer
- iPad or iPhone running iOS 9 or newer
- PC running Windows 8.1 or 10
- Android OS version 7 or newer

These devices will be able to run one of the major modern web browsers below, which may need to be updated on your device.

- Chrome 72 or newer
- Firefox 64 or newer
- Safari 11.1 or newer
- Edge 17 or newer
- IE 11

Additional basic needs

- Please add the following email address to your contacts so that emails from the system don't get dumped into spam admin@aimpathwaysonline.org
- Ability to connect to WIFI. Users will need the network name to connect to and the password, if applicable
- Charger and an outlet or external battery pack to plug into

Host Facility- for Orientation or Group Meetings/VCoP

- Ability for up to 60 people to connect to WIFI
 - Users will need the network name to connect to and the password, if applicable
 - It is impossible to provide a definitive number for internet speed requirements, but a safe bet is 150MB / 50MB for 40 people. You can check your speed either with their ISP (Verizon, Comcast, etc.) or by running a speed test on a site like speedtest.net. Results may vary depending on how many users are connected and whether or not they are connected via WIFI vs ethernet. Other factors that can affect internet speed, include IT infrastructure, time of day, number of users connected, and what types of media they are viewing (e.g. streaming video).
- Tech department in each participating school should "whitelist" the following email address so that emails from the system don't get dumped into spam admin@aimpathwaysonline.org
