

**Mesquite Education Association
FR Questions – May 2019**

- 1. With only a few computers available to SPED teachers and many of us sharing the same conference time, we are often left without a computer to work on documents, ARDS and progress/updating information in a timely manner. Why are we denied computers as SPED teachers when at least 90% of our job duties involve entering and keeping legal records of our SPED students?**

While we do not have the funds to provide each teacher a laptop of their own, we do have desktop computers available for teacher use as well as laptops to check out.

- 2. Since the legislature passed school finance HB3, will this affect only teachers or will all employees (support staff, paraprofessionals, etc.) benefit from this?**

With less than a week left in the current legislative session, House and Senate negotiators are meeting to decide the fate of HB3. A combined committee will decide how much money is allocated and for which employee group(s).
