Agenda Items

School News

- Review of 2019 SIP and Final Report Data

 Data shows fewer behavior referrals from 2018-2019. A school behavior team
 continues to meet once a month to discuss the where/why of recent behavior referrals,
 with the goal of reducing number of incidents.
- Overview of 2020 SIP Plan and School Goals
 - 1. Sunset students will demonstrate a 3% increase in both proficiency and growth in Mathematics across all grade levels for the 2019-2020 academic year.
 - Math Intervention class is one thing the school is doing to increase student math proficiency. These classes are double-blocked. Students attending class on the second day hear the lecture over again as they're doing their homework from the first day. It's a reteaching opportunity that seems to be helping students in a sizeable way. Also, student enrollement in this class is fluid; students move in and out at any time according to individual need.
 - 2. Sunset Junior will reduce class size by 3% in targeted academic areas based on need.
- Other:
- Accreditation: The Accreditation Team interviewed students as part of their assessment. Students praised RAP as a very positive opportunity that's helping them this year.
- Mathematical Mindsets Parents Course: The District is providing this course for interested parents who want to learn the "new math" theory that kids are using in class (so parents can help with homework).
- Student Recognition: This is to recognize students on the Honor Roll. The school is having an event where these students will be excused from RAP for 15 min or so, will be given a treat and some free time to socialize.

Next Meeting: January 23, 2020 @ 4:00 pm
