

# HONORS in Science

Any junior or senior with an interest in scientific research may be considered for the HONORS in Science program.

To complete the research necessary for HONORS, candidates must apply for the Science Honors Seminar course during the spring semester. Strong candidates are those who have demonstrated a sustained commitment to and aptitude for Science. *Students who are approved enroll in the 2 term solid Science Honors Seminar.*

## Prerequisites

- |                              |         |
|------------------------------|---------|
| • <i>Physics</i>             | 2 Terms |
| • <i>Chemistry</i>           | 1 Term  |
| • <i>Biology</i>             | 1 Term  |
| • <i>2 Science Electives</i> | 2 Terms |

## Honors Project

Candidates will engage in an original, laboratory-based, high school-appropriate scientific research project, produce a scientific research poster to be displayed in the Roberts Hall of Science, and present their research to the Science Department faculty. Candidates are awarded HONORS based on the determination of the Science Department faculty leadership team

.

## Concentration Project

Students may earn a CONCENTRATION in Science by successfully completing 12 or more terms of science courses at the Culver Academies. Students may earn *both* Honors and Concentration.
