

Getting Started with PPS Link

- 1) <http://link.princetonk12.org> (you can find this link under the Quick Links menu of the district website)
- 2) The login screen has PHS in background. Login the same way you login to your computer (first name last name) and same password.

- 3) The first time you login on your device, you will need to add an extension. This will pass your credentials from PPS Link to the different programs. No admin password is required to add the extensions.
- 4) If you are using Chrome, click on the blue "Add to Chrome" button, then accept the permissions.

For Safari, add the extension, then click on the Safari menu and select Preferences > Extensions. Make sure the check box next to ClassLink is checked.

Firefox usually adds the extension automatically, so you may not be asked to install anything.
