

Naviance Career Resources

Naviance is an internet-based tool to assist students with college/career planning. Students have access to an array of functions to help them reflect, explore and research colleges, careers and self. Results and findings can be saved for future reference and investigation.

To access Naviance:

- Go to www.d125.org/college, Select Naviance from the right rail
- Click “ **Click here to Link to Naviance**”
- Students will use their Stevenson e-mail address and network password.

*Student can explore Careers under the “**Career**” Menu. Under the “**About Me**” Menu, and then “**My Assessments**” students can explore the following:*

MI Advantage – This tool assesses multiple intelligences based on learning differences, along with strengths and challenges for students. The results provide suggestions on how students can further develop all of their intelligences. In addition, it pairs their intelligences with careers that match. Naviance uses occupational information network, which is sponsored by the US Department of Labor.

Learning Style Inventory – This assessment gives students insight to how they learn and their preferences. Students can increase self-awareness about their needs.

StrengthsExplorer – This assessment gauges students’ talents and skills. Students will learn their top three “themes” and how to maximize their successes. In addition they will learn suggested next steps. Please note, this assessment can only be taken once.

Career Key – This is an online, shorter, career assessment that will provide students with their Holland interest codes. For each Holland code, students can view careers that relate to that interest. From the list, students can add careers to the careers list.

Do What You Are – This tool matches a student’s personality type to careers. This is similar to the Myers-Briggs personality assessment, but is designed for high school students. The results will match their personality to careers and career clusters that they may find rewarding and satisfying.

Career Cluster Finder – This online questionnaire helps students discover career clusters that are most interesting to them.

Career Interest Profiler – This profiler uses Holland’s Code (Realistic, Investigative, Artistic, Social, Enterprising, and Conventional) to match careers to students’ interests. Students can view matching occupations, explore possible majors and colleges.

Roadtrip Nation – 3,500+ video interviews chronicling the diverse personal stories of leaders who have turned their interests into their life’s work.

Resume – This feature is especially helpful for students to organize their activity list and accomplishments. In addition, it can help keep your counselor apprised of your awards and involvement.
