

If you believe you've come into contact with someone within the community who has been diagnosed with COVID-19 (coronavirus), here is how you can determine your risk for contracting the virus.

NO RISK

WALKING BY OR BRIEFLY BEING IN THE SAME ROOM AS A PERSON WHO TESTED POSITIVE FOR COVID-19 AND WAS EXPERIENCING SYMPTOMS (FEVER, COUGH, SHORTNESS OF BREATH).

LOW RISK

BEING IN THE SAME ROOM AS A PERSON WHO TESTED POSITIVE FOR COVID-19 AND HAD SYMPTOMS BUT YOU WERE NOT WITHIN SIX FEET.

MEDIUM RISK

SUSTAINED CLOSE CONTACT (10 MINUTES OR LONGER) WITHIN SIX FEET OF A PERSON WITH COVID-19 WHILE THEY HAD SYMPTOMS AND/OR HAD DIRECT CONTACT WITH RESPIRATORY DROPLETS OF AN INFECTED INDIVIDUAL.

HIGH RISK

CLOSE HOUSEHOLD CONTACTS OF PEOPLE WITH A CONFIRMED CASE OF COVID-19 ARE AT AN ELEVATED RISK.

According to the CDC, individuals that are at high-risk of becoming ill from COVID-19 include older adults and individuals with serious chronic or long-term medical conditions.

If you are experiencing symptoms, contact your healthcare provider.
