

Let's Cook!

1. Find a recipe in a cookbook, online or on the back of a box in your cabinet.

My recipe is: _____

The ingredients and measurements for my recipe are:
(ex. 2 $\frac{1}{4}$ cups of flour)

2. Now let's double the recipe. What would the new measurements be for each ingredient?

3. What if you were to cut the recipe in half? What would the new measurements be for each ingredient?

4. Can your recipe be cut in fourth? Explain why or why not.

5. If you are cutting a recipe in half that calls for $\frac{2}{3}$ of a cup of sugar and you have $\frac{1}{2}$ cup of sugar in your cabinet, can you make the recipe? Explain why or why not.
