

# COVID-19: Recommendations for School Administrators on 2019 Novel Coronavirus

---

UPDATED: March 5, 2020

## To School District Leadership and Administrators:

We are writing to give you updated information on the novel coronavirus (2019-nCoV), a new virus causing respiratory illness.

The highest number of infections continue to be reported from Hubei Province, China. There have been a small number of cases of 2019-nCoV in B.C. which are being very closely managed. The risk to British Columbians remains low.

Our knowledge of this virus continues to grow and we are using new information to adjust our public health recommendations. We are now aware of early evidence that this virus can cause a range of mild to severe symptoms, and it is possible that people will not recognize symptoms that are mild. During this time, they can reduce the chance of spread by limiting contact with others.

Therefore, we now recommend that:

- Students or staff returning from **Iran or Hubei Province, China** consider staying home for 14 days after they left Hubei. They should monitor themselves daily for symptoms like fever or cough. Parents should assist children as needed. Those who develop symptoms, should stay home and call their health-care provider or 8-1-1 to discuss any need for testing and follow up.
- Students or staff, who have been in close contact with someone who has been diagnosed with 2019-nCoV consider staying home for 14 days after their last encounter. Individuals should monitor themselves daily for symptoms like fever and cough. Parents should assist children as needed. Those who develop symptoms should stay home and call their health-care provider or 8-1-1 to discuss any need for testing and follow up.
- Students or staff who have been in other areas affected by COVID-19 (see: *Information for Travellers* [http://www.bccdc.ca/health-info/diseases-conditions/coronavirus-\(novel\)](http://www.bccdc.ca/health-info/diseases-conditions/coronavirus-(novel))) should monitor themselves daily for symptoms like fever or cough for 14 days. Parents should assist children as needed. Those who develop symptoms should stay home and call their health-care provider or 8-1-1 to discuss any need for testing and follow up.

**While these recommendations are important, they are voluntary. School administrators and staff are not expected to enforce or monitor them.** Please reassure families with students required to stay home that they do not need to worry about missing school and offer opportunities for distance learning or catch up once the students are cleared to return.

The Ministry of Education continues to be in close contact with public health officials at all levels of government and ask the public not to make assumptions about the risk of students or staff based on their ethnicity or travel history.

Medical Health Officers are your school medical officers. Their role is to undertake communicable disease risk assessments and provide guidance on risk management. Please do not make assumptions about the risk of students or staff based on their ethnicity or travel history. If you have concerns, including regarding an individual case, please contact your Medical Health Officer for assistance.

### **Advice on School Events, Outings and Field Trips**

It is not necessary to cancel school events, outings or field trips to public locations in B.C. and Canada and to most places in the world. However, please check the latest travel notices and advisories on the Government of Canada's [website \(https://travel.gc.ca/travelling/advisories\)](https://travel.gc.ca/travelling/advisories). Recommendations change as new information becomes available.

Additional COVID-19 travel advice is also available on Health Canada's [website \(https://www.canada.ca/en/public-health/services/diseases/2019-novel-coronavirus-infection/latest-travel-health-advice.html\)](https://www.canada.ca/en/public-health/services/diseases/2019-novel-coronavirus-infection/latest-travel-health-advice.html).
