Be Safe

Be Respectful

Be Responsible

Monday, Jan 6	Voting, in class, for our Yogurtland yogurt name!
Friday, Jan. 10	
Upcoming	1/20 No School MLK Day 1/24 Coffee with the Principal 1/27-31 Great Kindness Challenge 1/27 School Site Council

Dear Partners in Learning,

Starting this week, students will have the opportunity to take a second diagnostic i-ready assessment. The Diagnostic starts each student at a level based on an educated guess that includes their chronological grade level. As students answer questions correctly or incorrectly, the test adjusts up or down, with questions of varying difficulty, until the assessment reaches the level of difficulty that is "just right" for each student. This means that on the i-Ready Diagnostic, no two students will take the same test. Just as every student has a different ability level, every student will have a different test experience. Students will see material teachers haven't covered. This is an intentional part of the design of the adaptive assessment. Students may see above-grade level material and below-grade level material. Every student will receive a challenging test. The Diagnostic is designed for students to get about 50% of the questions correct and 50% incorrect to help identify their precise abilities on a range of skills. A student's assessment score is not based on the number of items he or she answers correctly. A student's score is determined by making adjustments after each item to determine his or her proficiency level estimate. Encourage students to try their best and make their best guess if a question seems too difficult. It is better for a student to guess and move on than to try for too long to get a question right. i-ReadyCentral.com/FamilyCenter

Please remember all students must be picked up within 15 minutes of dismissal. Students in grades 1-3 are dismissed at 2:30 and students in grades 4-6 are dismissed at 2:45. Please make sure to pick up all students by 3:05. If you do have an emergency and you are running a few minutes late, please make sure you call 548-5085 so we can let your child know so they are not worried about you!

We Won Yogurtland!
With all of your yogurt purchases, we won the Yogurtland contest!
They will be donating \$300 to our school and the students will be voting on a yogurt that will be sold at their store!
Thank you for your support! More info to come soon!

follow us on instagram @emperoreaglestcusd

If you would like to help our local Girl Scout Troop, 5141, we will be taking donations in the office!

Amazon Smile

https://smile.amazon.com/hz/charitylist/ls/XMM8C4TT8TXT/ref=smi_ext_lnk_lcl-cl

WHEN YOU PURCHASE THROUGH AMAZON SMILE, A PORTION COMES BACK TO OUR SCHOOL! LAST MONTH THEY SENT A CHECK FOR \$120! THANK YOU FOR YOUR SUPPORT!

Temple City Unified School District Health Services

Health services is sending out this letter as a reminder to check your child periodically for head lice. Below is helpful information to help you learn more about head lice.

1. What to look for:

- Itching of the scalp that does not go away.
- Small whitish eggs (nits) attached to individual hairs that are difficult or impossible to remove. Be careful not to confuse nits with dandruff or hair gel that can be brushed off of the hair shaft.
- Tiny brownish insects (lice) that are usually found close to the scalp, which are flat in shape, measure 1/10 to 1/8 of an inch in length and have short thick legs. The insects can move quickly but do not jump or fly.

2. How head lice are spread:

- By direct head to head contact with someone who has head lice.
- By sharing personal items such as combs, brushes, hair accessories, hats, scarves, jackets, sweaters, towels, sheets, pillowcases, blankets...
- Several studies have shown that lice are not highly transferable in the school setting.

3. How a case of head lice is treated:

- By using over the counter and prescription rinses and shampoos. There are also many home-based "suffocation" remedies.
- Removal of all nits. This is very important and you should inspect your child's hair every day for a week to ensure that all nits are removed.
- It is necessary to repeat treatment in 7 to 10 days.

4. How to attend to the environment:

- Wash or dry clean all recently worn clothing and bed linens. Remember to include hats scarves, gloves, mittens and hair accessories.
- Whenever possible, place items in a clothes dryer at high heat for 20 minutes.
- Clean combs and brushes by soaking in hot (130 degree) soapy water or lice control product solution for 10 minutes, then scrubbing with an old tooth brush.
- Check all household members/contacts, but only treat them if they have lice. Do not treat as a precaution. Pets are not carriers of lice.

If you have any questions or concerns please do not hesitate to call.

NEW YEARS, A NEW
START FOR EVERYONE

REFUGE FOR RESCUES

We all start the New Year with a fresh, happy start, but have you ever thought about the lonely animals in shelters who don't even know when the year starts or ends? Dropping off a few donations in the Refuge for Rescues box can really make the animals feel new and happy, thus could be their best New Year yet!

HELP SUPPORT THE ANIMALS AT THE BALDWIN PARK ANIMAL SHELTER

These lonely animals in the animal shelter are seeking love and forever homes. During their time in the shelter, they are sitting in cold, dark kennels. To make their stay more comfortable, and giving them a new fresh start for the 2020 year, we would really appreciate it if you help donate to the animals. Even donating a used towel, old toy, or some pet treats would make their New Year start off great, and shelter stay special. Please consider donating or even adopting a pet! Happy new year!

Love,
Girl Scout Troop 5141
