Dear Partners in Learning,  
It can be hard to find appropriate websites to help students with their learning. Recently, we were introduced to two sites that you may find helpful!

[startingsmarter.org](http://startingsmarter.org) is a website that helps parents to understand state testing scores, provides resources for parents, and has great test questions that will prepare students for the state test that is given for students in grades 3-6! This website includes some of the following helpful information:

## Look at your state's practice test.

Along with grades and class work, the state test is another way to see where your child needs more support. Tests can be nerve-racking—boost self-confidence by showing your child how to take on challenges.

## GET A QUICK GUT CHECK.

Use the new Readiness Check to see your child's progress and get skill specific videos, activities, and more to support math and reading at home. [Get the Readiness Check.](#)

## [Libby, by OverDrive - an app for library ebooks and audiobooks](#)

Libby is an app where you can put in your library card number and then download books and audio books for free!
