COVID-19 Community Screening Resources Now Live

Lawrence General Hospital now has two new COVID-19 (Coronavirus 2019) community screening resources where patients, families, and providers in the community can obtain an assessment of their COVID-19 risk, possible need for testing, and recommendations for next steps:

BY PHONE: The Lawrence General Hospital COVID-19 (Coronavirus 2019) Community Screening line is staffed by one of our nurses 24 hours a day, 7 days a week and can be reached by calling us at **978-946-8409**. In an effort to reduce transmission, we ask that individuals call the screening line prior to seeking COVID-19 screening at the hospital; unless you are experiencing a medical emergency.

ONLINE: The community can also use Lawrence General's new online screening tool, where you'll be prompted to answer several questions and will be contacted by a nurse for follow-up guidance.
