WEB DEVELOPMENT

ABOUT

Web Development is a course designed to guide students in a project-based environment, in the development of up-to-date concepts and skills that are used in the development of today's websites. Students will learn the fundamentals of how the internet works as well as the basic building blocks of the World Wide Web, HTML5 coding, Cascading Style Sheets, and JavaScript. They will follow the steps to create a website by planning, designing, developing, deploying, and maintaining website projects. **Concurrent Enrollment available.**
