

TOWN OF SUFFIELD
WATER POLLUTION CONTROL AUTHORITY

The Town of Suffield Water Pollution Control Authority needs your help. The use of sanitary wipes and paper towels has increased. These items are not designed to break up when wet. The increase in wipes and paper towels being flushed causes a significant increase in wastewater pump malfunctions; and clogged pumps may result in sewage backing up into basements. These malfunctions take hours of our operator's time and cause significant problems to the operations of our pump stations. Below is a picture of a clogged pump from a nearby town yesterday.

Please help spread the word; Please dispose of wipes in the trash.
