

## **G Suite for Education**

Our Upper School students and teachers have access to a multi-functional platform for learning through Google!

### **Gmail**

Our internal gmail system allows students and teachers to communicate safely only within our *mysundanceschool.com* domain.

### **Drive**

Drive lets students create, store and organize assignments, documents, slides, sheets, and drawings from any device. All work can instantly be shared with teachers with an easy click.

### **Hangouts**

Through hangouts, teachers can meet with students virtually through secure video calls and chat messaging to individualize student learning and provide real time instruction. Shared documents and live video combine to allow teachers to work in depth with students and provide the education and the support that our kids need.

### **Classroom**

In this part of Google suites, the students' different subjects are organized to provide them with easy access to all their assignments, communications from different teachers and feedback for their work, all in one place.
