

# About

- Over 150 million animals are killed each year due to animal testing for household items.
- Europe, the world's largest cosmetic market, Israel and India have already banned animal testing for cosmetics and the sale or import of newly animal-tested beauty products.
- Several cosmetic tests commonly performed on mice, rats, rabbits, and guinea pigs include: skin and eye irritation tests where chemicals are rubbed on shaved skin or dripped into the eyes without any pain relief

## Pros and Cons of animal testing

1. Drugs and vaccines tested on animals have saved millions
2. Animals are treated poorly depending on the laboratory
3. Cosmetic animal testing has killed over 100 million animals a year.
4. Some testing will lead to future research to improve new vaccines.

# The effects

## Physical effects-

1. Animals can be left with burns, scars, scabs and missing limbs.
2. They can also be physically unstable was the animal can not walk correctly

## Mental Effects

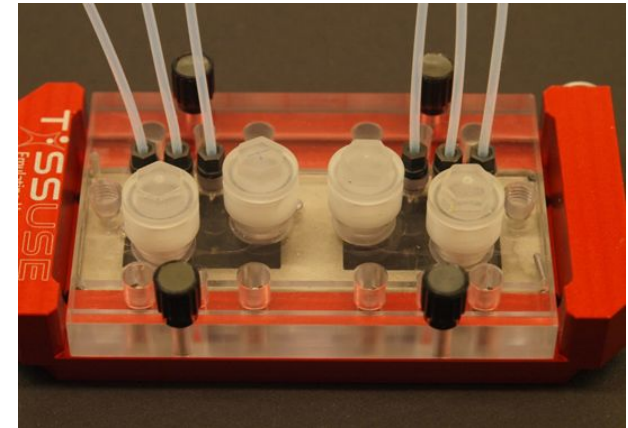

1. Most animals that are saved from these laboratories suffer from PTSD.
2. Which later this PTSD can turn into anxiety

# Solutions

## DNA tablet

1. A cell machine that is cheaper than actual animals and can be tested on.

## Apps and organizations

### Organizations you can donate to

- Beagle freedom project
- Peta
- Cruelty free international

### Apps

- Cruelty cutter

### Cruelty free companies

- Trader jose
- Lush
- Sun Bum
