

## Instructions for Home Use

When you get home with your computer you will need to do the following.

1. Before logging into the computer, you will need to join your wireless network.
2. When you are at the login screen click on the network icon  down on the right-hand side of your screen.
3. Find the name of your network and click on it to join.
4. Once the computer has joined your network you can now login.
