

Name: _____ Date: _____

Insect Comparing and Contrasting:

Directions: Go outside and find 2 different insects. (Flip over a rock and/or a log. Dig a small hole or look closely on a leaf. If you have a sibling, have them help you look!) Next, compare them. Find at least two ways they are similar and two ways they are different.

How are the insects similar?

How are the insects different?

STEM Challenge:

We have learned that insects need food, air, water and space to grow and survive.

Question: Can you build an insect habitat that has these 4 needs included? Draw your habitat you build below and remember to label your illustration.

My insect habitat:

Insect Scavenger Hunt:

Try to find at least one of each insect listed below. Make tally marks if you find more than one.
Happy Hunting!

Ant:	Ladybug:	Grasshopper:
Butterfly:	Fly:	Beetle:
Cricket:	Bee:	Egg:
Larva:	Pupa:	Nymph:
Flying Insect:	Crawling Insect:	Jumping Insect:

*Remember insects must stay outside!
